Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2005 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Abatement and removal

Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).

Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).

Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).

Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).

BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).

Enhancement of Nitrate Reduction in Fe^0-Packed Columns by Selected Cations. — Yong H. Huang and Tian C. Zhang; 131(4), 603-11 (2005).

Comparison of Oxygen Transfer Parameters Determined from the Steady State Oxygen Uptake Rate and the Non-Steady-State Changing Power Level Methods. — Venkatram Mahendraker, Donald S. Mavinic, and Kenneth J. Hall; 131(5), 692-701 (2005).

Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).

Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Zero-Valent Iron-Assisted Autotrophic Denitrification. — Susham Biswas and Purnendu Bose; 131(8), 1212-20 (2005).

Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (2005).

Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-606 (2005).

Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (2005).

Acid mine water

Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Acidic water

Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).

Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).

Acids

Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Activated carbon

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).

Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).

Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (2005).

Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (2005).

Effect of Adsorbent Particle Layering on Performance of Conventional and Tapered Fixed-Bed Adsorbers. — Alexander P. Mathews; 131(11), 1488-94 (2005).

Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).

Activated carbons

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).

Activated sludge

Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).

Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2005 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Abatement and removal

Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).

Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).

Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).

Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).

BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (2005).

Acid mine water

Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Acidic water

Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).

Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).

Acids

Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Activated carbon

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).

Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).

Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (2005).

Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (2005).

Effect of Adsorbent Particle Layering on Performance of Conventional and Tapered Fixed-Bed Adsorbers. — Alexander P. Mathews; 131(11), 1488-94 (2005).

Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).

Activated carbons

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).

Activated sludge

Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).

Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).

Using Polyphosphate Buffering to Treat Phosphorus-Deficient Wastewater. — Willie F. Harper, Jr.; 131(4), 563-9 (2005).

Utilization of an Activated Sludge for the Improvement of an Existing Thermophilic Wastewater Treatment System. — David Quesnel and George Nakhla; 131(4), 570-8 (2005).

Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (2005).

Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).

Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Dual Conditioning of Sludge Utilizing Polyampholyte. — J. S. Wang, J. C. Liu, and D. J. Lee; 131(12), 1659-66 (2005).

Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Adsorption

Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).

Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Biotransformation of Carbon Tetrachloride and Anaerobic Granulation in a Upflow Anaerobic Sludge Blanket Reactor. — Delia Teresa Sponza; 131(3), 425-33 (2005).

Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).

Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (2005).

Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (2005).

Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).

Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (2005).

Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (2005).

Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (2005).

Effect of Adsorbent Particle Layering on Performance of Conventional and Tapered Fixed-Bed Adsorbers. — Alexander P. Mathews; 131(11), 1488-94 (2005).

Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).

Advection

Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Aeration

Design Characteristics of Single Hub Paddle Wheel Aerator. — Sanjib Moulick, S. Bandyopadhyay, and B. C. Mal; 131(8), 1147-54 (2005).

Air–Water Mass Transfer on a Stepped Waterway. — L. Toombes and H. Chanson; 131(10), 1377-86 (2005).

Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (2005).

Aerobic processes

Effect of Substrate Nitrogen/Chemical Oxygen Demand Ratio on the Formation of Aerobic Granules. — Shu-Fang Yang, Joo-Hwa Tay, and Yu Liu; 131(1), 86-92 (2005).

Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).

Using Polyphosphate Buffering to Treat Phosphorus-Deficient Wastewater. — Willie F. Harper, Jr.; 131(4), 563-9 (2005).

Aerobic treatment

Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).

Aerosols

Estimating Solar and Nonsolar Inactivation Rates of Airborne Bacteria. — Tania Paez-Rubio and Jordan Peccia; 131(4), 512-7 (2005).

Aggregation

Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).

Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (2005).

Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Aging

Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).

Agricultural wastes

Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Agricultural watersheds

Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Air flow

Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (2005).

Air injection

Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).

Air pollution
Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).
Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).
Transient Response of Flow-Direction-Switching Vapor-Phase Biofilters. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(7), 999-1009 (2005).
Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).
Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).
Regular Transient Loading Response in a Vapor-Phase Flow-Direction-Switching Biofilter. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(12), 1649-58 (2005).

Air stripping
Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).
Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).

Air temperature
Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Air water interactions
Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).

Algae
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Algorithms
Modeling Cr(VI) Reduction and Phenol Degradation in a Coculture Biofilm Reactor. — Evans M. Nkhalambayausi-Chirwa and Yi-Tin Wang; 131(11), 1495-506 (2005).

Alkalinity
Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).

Aluminum
Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (2005).

Ammonia
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).
Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).
Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Anaerobic digestion
Anaerobic Degradation of Sulfate Laden Organics Employing Different Reactor System Configurations. — S. K. Patidar and Vinod Tare; 131(2), 216-24 (2005).
Full-Scale Application of a Dynamic Model for High-Rate Anaerobic Wastewater Treatment Systems. — Ian R. Ramsay and Pratap C. Pullammanappallil; 131(7), 1030-6 (2005).
Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Anaerobic processes
Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).
Using Polyphosphate Buffering to Treat Phosphorus-Deficient Wastewater. — Willie F. Harper, Jr.; 131(4), 563-9 (2005).
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).
Fate of Tolyltriazoles and Nonylphenol Ethoxylates in Upflow Anaerobic Sludge Blanket Reactors. — Pham thi Tham and Kevin J. Kennedy; 131(6), 892-900 (2005).

Analytical techniques
Analytical Models for the Design of Iron-Based Permeable Reactive Barriers. — Alan J. Rabideau, Raghavendra Suribhatla, and James R. Craig; 131(11), 1589-97 (2005).

Arsenic
Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).
Arsenite Oxidation by *Alcaligenes faecalis* Strain O1201. — Arthon Suttigarn and Yi-Tin Wang; 131(9), 1293-301 (2005).
Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (2005).

Attenuation
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

Auto-regressive models
Flow Data, Inflow/Infiltration Ratio, and Autoregressive Error Models. — Z. Zhang; 131(3), 343-9 (2005).

Backwashing
Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).
Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Bacteria
Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).
Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Barriers
Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).
Analytical Models for the Design of Iron-Based Permeable Reactive Barriers. — Alan J. Rabideau, Raghavendra Suribhatla, and James R. Craig; 131(11), 1589-97 (2005).

Batch processing
Cometabolic Transformation of High Concentrations of 4-Chlorophenol in an Immobilized Cell Hollow Fiber Membrane Bioreactor. — Yi Li and Kai-Chee Loh; 131(9), 1285-92 (2005).

Bed roughness
Mountain Streams—Modeling Hydraulics and Substance Transport. — W. K. Meier and P. Reichert; 131(2), 252-61 (2005).

Bedforms
Diffusive Behavior of Bedform-Induced Hyporheic Exchange in Rivers. — Andrea Marion and Mattia Zaramella; 131(9), 1260-6 (2005).

Benefit cost ratio
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Benzene
Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Best Management Practice
Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Best management practice
Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Best management practices
Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).

Biodegradation
Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (2005).

Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).

Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (2005).

Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Cometabolic Transformation of High Concentrations of 4-Chlorophenol in an Immobilized Cell Hollow Fiber Membrane Bioreactor. — Yi Li and Kai-Chee Loh; 131(9), 1285-92 (2005).

Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Biofilm
Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).

Modeling Steady-State Biofilms with Dual-Substrate Limitations. — Shaoying Qi and Eberhard Morgenroth; 131(2), 320-6 (2005).

Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).

Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).

Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Modeling Cr(VI) Reduction and Phenol Degradation in a Coculture Biofilm Reactor. — Evans M. Nkhalambayausi-Chirwa and Yi-Tin Wang; 131(11), 1495-506 (2005).

Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).

Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Biological treatment
Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Anaerobic Degradation of Sulfate Laden Organics Employing Different Reactor System Configurations. — S. K. Patidar and Vinod Tare; 131(2), 216-24 (2005).

Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Biotransformation of Carbon Tetrachloride and Anaerobic Granulation in a Upflow Anaerobic Sludge Blanket Reactor. — Delia Teresa Sponza; 131(3), 425-33 (2005).

Potential Improvement in Biofilter Design through the Use of Heterogeneous Packing and a Conical Biofilter Geometry. — He Yang and D. Grant Allen; 131(4), 504-11 (2005).

Estimating Solar and Nonsolar Inactivation Rates of Airborne Bacteria. — Tania Paez-Rubio and Jordan Peccia; 131(4), 512-7 (2005).

Utilization of an Activated Sludge for the Improvement of an Existing Thermophilic Wastewater Treatment System. — David Quesnel and George Nakhla; 131(4), 570-8 (2005).

Transient Response of Flow-Direction-Switching Vapor-Phase Biofilters. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(7), 999-1009 (2005).

Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).

Cometabolic Transformation of High Concentrations of 4-Chlorophenol in an Immobilized Cell Hollow Fiber Membrane Bioreactor. — Yi Li and Kai-Chee Loh; 131(9), 1285-92 (2005).

Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (2005).

Regular Transient Loading Response in a Vapor-Phase Flow-Direction-Switching Biofilter. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(12), 1649-58 (2005).

Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Septic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Biomass
Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).

Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Septic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Boundary layer
Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).

Bridge construction
Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).

Bubbles
Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).

Buildings, public
Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Cadmium
Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).

Calcium
Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Calibration
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

California
Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242 51 (2005).
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).
Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Canada
Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Carbon
Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).

Case reports
Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).
Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (2005).

Cast iron
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Cations
Enhancement of Nitrate Reduction in Fe^0-Packed Columns by Selected Cations. — Yong H. Huang and Tian C. Zhang; 131(4), 603-11 (2005).

Cements
Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).

Centrifuge model
Effects of Clay Content and Temperature on Crude Oil (Nonvolatile Components) Transport in Unsaturated Soils: Centrifuge Study. — R. C. K. Wong; 131(10), 1473-8 (2005).

Ceramics
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Chemical oxygen demand
Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Chemical treatment
Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (2005).
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).

Chemical wastes
Utilization of an Activated Sludge for the Improvement of an Existing Thermophilic Wastewater Treatment System. — David Quesnel and George Nakhla; 131(4), 570-8 (2005).

Chemicals
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (2005).

Chesapeake Bay
Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).

Chloride
Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).
Dual Conditioning of Sludge Utilizing Polyampholyte. — J. S. Wang, J. C. Liu, and D. J. Lee; 131(12), 1659-66 (2005).

Chlorides
Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).

Chlorination
Factors Affecting Inactivation Behavior in the Monochloramination Range. — Chii Shang, Yinan Qi, and Irene M. C. Lo; 131(1), 119-29 (2005).

Chlorophyll
Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).

Chromium
Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-605 (2005).

Circulation
Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Cisterns
Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).
Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).

Clays
Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).

Climate changes
Can Hazardous Waste Sites be Breached as a Result of Future Climate Change? — Timothy M. Kelly and John W. Winchester; 131(5), 810-4 (2005).

Clogging
Enhancement of Nitrate Reduction in Fe^0-Packed Columns by Selected Cations. — Yong H. Huang and Tian C. Zhang; 131(4), 603-11 (2005).
Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Coagulation
Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).
Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (2005).
Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).
Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).
Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Coal mines
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).

Coal mining
Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

Coastal environment
Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).
Diffusional Mass Transfer at Sediment–Water Interface of Cylindrical Sediment Oxygen Demand Chamber. — Feleke Arega and Joseph H. W. Lee; 131(5), 755-66 (2005).

Coatings
Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Coefficients
Master Diagnostic Curve for Dispersion Coefficient of Soils. — Sushil K. Singh; 131(6), 988-93 (2005).

Cohesive sediment
Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Cold regions
Effects of Clay Content and Temperature on Crude Oil (Nonvolatile Components) Transport in Unsaturated Soils: Centrifuge Study. — R. C. K. Wong; 131(10), 1473-8 (2005).

Coliform bacteria
Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Color
On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).
Modeling Discoloration in Potable Water Distribution Systems. — J. B. Boxall and A. J. Saul; 131(5), 716-25 (2005).
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Colorado River
Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).

Combined sewer overflow
Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Combustion
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Comparative studies
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Composting
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Computational fluid dynamics technique
Alternative Approaches to Modeling Fluence Distribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).

Computer programming
Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).

Concrete aggregates
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).

Conservation
Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Contaminants
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).
Effects of Clay Content and Temperature on Crude Oil (Nonvolatile Components) Transport in Unsaturated Soils: Centrifuge Study. — R. C. K. Wong; 131(10), 1473-8 (2005).

Contamination
Effects of Weathering on Treatment of Lead Contaminated Soils. — Robert Stanforth, Chin-Foo Yap, and Rajeev Nayar; 131(1), 38-48 (2005).
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).
Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).
Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).

Correlation
Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).

Corrosion
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Costs
Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Covariance
Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).

Crossflow
Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Crossflow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).

Data analysis
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).
Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).
Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).

Decision making
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Decision support systems
Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).

Decomposition
Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).

Degradation
Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (2005).
Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive

Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).
Modeling Cr(VI) Reduction and Phenol Degradation in a Coculture Biofilm Reactor. — Evans M. Nkhalambayausi-Chirwa and Yi-Tin Wang; 131(11), 1495-506 (2005).

Denitrification
Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).
Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).
Zero-Valent Iron-Assisted Autotrophic Denitrification. — Susham Biswas and Purnendu Bose; 131(8), 1212-20 (2005).
Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (2005).

Desalination
Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).
Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Design
Design Characteristics of Single Hub Paddle Wheel Aerator. — Sanjib Moulick, S. Bandyopadhyay, and B. C. Mal; 131(8), 1147-54 (2005).
Analytical Models for the Design of Iron-Based Permeable Reactive Barriers. — Alan J. Rabideau, Raghavendra Suribhatla, and James R. Craig; 131(11), 1589-97 (2005).
Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman: 131(12), 1755-9 (2005).

Desorption
Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).
Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei. Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).
Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).
Application of an Intraparticle Diffusion Model to Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).
Combined Effects of Aging and Cosolvents on Sequestration of Phenanthrene in Soils. — An Li and Xiaoyu Liu; 131(7), 1068-72 (2005).

Dewatering
Protocol to Measure Network Strength of Sludges and Its Implications for Dewatering. — Banu Örmeci and Mohammad M. Abu-Orf; 131(1), 80-5 (2005).
Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).
Measuring Sludge Network Strength Using Rheology and Relation to Dewaterability, Filtration, and Thickening—Laboratory and Full-Scale Experiments. — Mohammad M. Abu-Orf and Banu Örmeci; 131(8), 1139-46 (2005).
Dual Conditioning of Sludge Utilizing Polyampholyte. — J. S. Wang, J. C. Liu, and D. J. Lee; 131(12), 1659-66 (2005).

Diffusion
Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).
Application of an Intraparticle Diffusion Model to Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).
Diffusive Behavior of Bedform-Induced Hyporheic Exchange in Rivers. — Andrea Marion and Mattia Zaramella; 131(9), 1260-6 (2005).

Diffusion coefficient
Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).
Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modified Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).
Application of an Intraparticle Diffusion Model to Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).

Digital techniques
On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).

Dimensional analysis
Design Characteristics of Single Hub Paddle Wheel Aerator. — Sanjib Moulick, S. Bandyopadhyay, and B. C. Mal; 131(8), 1147-54 (2005).

Disinfection
Factors Affecting Inactivation Behavior in the Monochloramination Range. — Chii Shang, Yinan Qi, and Irene M. C. Lo; 131(1), 119-29 (2005).
Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).
Numerical Computational Fluid Dynamics-Based Models of Ultraviolet Disinfection Channels. — D. A. Lyn and E. R Blatchley, III; 131(6), 838-49 (2005).
A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).
Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).
Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).
Alternative Approaches to Modeling Fluence Distribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).
Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (2005).
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Dispersion
Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Dissolved organic carbon
Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (2005).
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Dissolved oxygen
Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).
Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).
Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).
Air–Water Mass Transfer on a Stepped Waterway. — L. Toombes and H. Chanson; 131(10), 1377-86 (2005).

Dissolved solids
Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).

Domestic wastes
Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).
Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-

Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Drainage

Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

Dredged spoil

Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Dust

Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Dyes

Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).

Dynamic models

Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Dynamic tests

Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Full-Scale Application of a Dynamic Model for High-Rate Anaerobic Wastewater Treatment Systems. — Ian R. Ramsay and Pratap C. Pullammanappallil; 131(7), 1030-6 (2005).

Ecology

Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Effluents

Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).

Electrokinetics

Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).

Emission control

Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (2005).

Emissions

Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).

Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Energy

Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (2005).

Energy dissipation

Protocol to Measure Network Strength of Sludges and Its Implications for Dewatering. — Banu Örmeci and Mohammad M. Abu-Orf; 131(1), 80-5 (2005).

Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Entrainment

Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Environmental engineering

Evaluation of Probabilistic Point Estimate Methods in Uncertainty Analysis for Environmental Engineering Applications. — Christina W. Tsai and Samuela Franceschini; 131(3), 387-95 (2005).

Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Cross-flow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).

Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).

Environmental issue

Degradation of Toxaphene by Zero-Valent Iron and Bimetallic Substrates. — Clayton J. Clark, II, Xiaosong Chen, and Seethu Babu; 131(12), 1733-9 (2005).

Environmental issues

Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Environmental quality

Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Enzymes

Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

2,4,6-Trinitrotoluene Transformation Using Spinacia Oleracea: Saturation Kinetics of the Nitrate Reductase Enzyme. — Clinton P. Richardson and Enric Bonmati; 131(5), 800-9 (2005).

Equilibrium

Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (2005).

Errors

Flow Data, Inflow/Infiltration Ratio, and Autoregressive Error Models. — Z. Zhang; 131(3), 343-9 (2005).

Eutrophication

Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).

Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).

Evaporation

Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Experimentation

Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (2005).

Explosives

Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

2,4,6-Trinitrotoluene Transformation Using Spinacia Oleracea: Saturation Kinetics of the Nitrate Reductase Enzyme. — Clinton P. Richardson and Enric Bonmati; 131(5), 800-9 (2005).

External pressure

Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).

Facilities

Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Fences

Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Filters
Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).
Transient Response of Flow-Direction-Switching Vapor-Phase Biofilters. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(7), 999-1009 (2005).

Filtration
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).
Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).
Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).
Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Crossflow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).
Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).
Measuring Sludge Network Strength Using Rheology and Relation to Dewaterability, Filtration, and Thickening—Laboratory and Full-Scale Experiments. — Mohammad M. Abu-Orf and Banu Örmeci; 131(8), 1139-46 (2005).
Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).
Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).
Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).
Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).
Regular Transient Loading Response in a Vapor-Phase Flow-Direction-Switching Biofilter. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(12), 1649-58 (2005).

Fine-grained soils
Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).

Fixed-bed operations
Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Flocculation
Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).
Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).
Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Florida
Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Flotation
Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).

Flow patterns
Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).

Flow resistance
Mountain Streams—Modeling Hydraulics and Substance Transport. — W. K. Meier and P. Reichert; 131(2), 252-61 (2005).

Flow simulation
Numerical Computational Fluid Dynamics-Based Models of Ultraviolet Disinfection Channels. — D. A. Lyn and E. R. Blatchley, III; 131(6), 838-49 (2005).
Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).

Fluidized beds
Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).
Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (2005).

Flushing
Modeling Discoloration in Potable Water Distribution Systems. — J. B. Boxall and A. J. Saul; 131(5), 716-25 (2005).

Food
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).
Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Fossil fuels
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Fouling
Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).
Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).
Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Crossflow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).
Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).

Fractals
Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Fuzzy sets
Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).
Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (2005).

Gas
Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).
Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).
Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (2005).
Regular Transient Loading Response in a Vapor-Phase Flow-Direction-Switching Biofilter. —

William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(12), 1649-58 (2005).

Gas pressure

One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Gasoline

Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (2005).

Geomembrane

Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).

Geometry

Potential Improvement in Biofilter Design through the Use of Heterogeneous Packing and a Conical Biofilter Geometry. — He Yang and D. Grant Allen; 131(4), 504-11 (2005).

Geosynthetics

Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Septic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Ground-water chemistry

Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Ground-water discharge

Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Ground-water management

Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-606 (2005).

Ground-water pollution

Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).

Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).

Chemistry of Modified Fenton's Reagent (Catalyzed H_2O_2 Propagations–CHP) for In Situ Soil and Groundwater Remediation. — Richard J. Watts and Amy L. Teel; 131(4), 612-22 (2005).

Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).

Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).

Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).

Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (2005).

Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Zero-Valent Iron-Assisted Autotrophic Denitrification. — Susham Biswas and Purnendu Bose; 131(8), 1212-20 (2005).

Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).

Analytical Models for the Design of Iron-Based Permeable Reactive Barriers. — Alan J. Rabideau, Raghavendra Suribhatla, and James R. Craig; 131(11), 1589-97 (2005).

Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).

Ground-water treatment

Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (2005).

Harbors

Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Hazardous waste

Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (2005).

Can Hazardous Waste Sites be Breached as a Result of Future Climate Change? — Timothy M. Kelly and John W. Winchester; 131(5), 810-4 (2005).

Heavy metals

Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).

Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).

Study on Optimal Conditions for Recovery of EDTA from Soil Washing Effluents. — Irene M. C. Lo and Weihua Zhang; 131(11), 1507-13 (2005).

Herbicides

Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Heterogeneity

Potential Improvement in Biofilter Design through the Use of Heterogeneous Packing and a Conical Biofilter Geometry. — He Yang and D. Grant Allen; 131(4), 504-11 (2005).

Highways

Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

History

Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).

Hybrid methods

Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).

Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (2005).

Hydraulic conductivity

Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Hydraulic design

Waterhammer Analysis—Essential and Easy (and Efficient). — Don J. Wood; 131(8), 1123-31 (2005).

Hydraulic networks

Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).

Hydraulic transients

Waterhammer Analysis—Essential and Easy (and Efficient). — Don J. Wood; 131(8), 1123-31 (2005).

Hydraulics

Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Hydrocarbons

Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).

Application of an Intraparticle Diffusion Model to

Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).

Hydrodynamics

Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Hydrogen

Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Hydrogen peroxide

Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).

Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Hydrogen sulfides

Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).

Hydrographs

Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).

Hydrologic models

Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Hysteresis

Master Diagnostic Curve for Dispersion Coefficient of Soils. — Sushil K. Singh; 131(6), 988-93 (2005).

Image analysis

On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).

In situ tests

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).

India

Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Indoor air pollution

Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Industrial plants

Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Industrial wastes

Utilization of an Activated Sludge for the Improvement of an Existing Thermophilic Wastewater Treatment System. — David Quesnel and George Nakhla; 131(4), 570-8 (2005).

Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).

Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).

Infiltration

Flow Data, Inflow/Infiltration Ratio, and Autoregressive Error Models. — Z. Zhang; 131(3), 343-9 (2005).

Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Septic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Infiltration rate

Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Inflow

Flow Data, Inflow/Infiltration Ratio, and Autoregressive Error Models. — Z. Zhang; 131(3), 343-9 (2005).

Inspection

Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).

Ion adsorption

Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).

Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).

Iron

Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).

Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).

Effects of Selected Good's pH Buffers on Nitrate Reduction by Iron Powder. — Tian C. Zhang and Yong H. Huang; 131(3), 461-70 (2005).

Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Chemistry of Modified Fenton's Reagent (Catalyzed H_2O_2 Propagations–CHP) for In Situ Soil and Groundwater Remediation. — Richard J. Watts and Amy L. Teel; 131(4), 612-22 (2005).

Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Zero-Valent Iron-Assisted Autotrophic Denitrification. — Susham Biswas and Purnendu Bose; 131(8), 1212-20 (2005).

Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-606 (2005).

Irrigation practices

Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Isotherms

Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (2005).

Kinetics
Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).
Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (2005).
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).
Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).
2,4,6-Trinitrotoluene Transformation Using Spinacia Oleracea: Saturation Kinetics of the Nitrate Reductase Enzyme. — Clinton P. Richardson and Enric Bonmati; 131(5), 800-9 (2005).
Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).
Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Laboratory investigation
Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).

Laboratory tests
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).
Measuring Sludge Network Strength Using Rheology and Relation to Dewaterability, Filtration, and Thickening—Laboratory and Full-Scale Experiments. — Mohammad M. Abu-Orf and Banu Örmeci; 131(8), 1139-46 (2005).
Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).
Diffusive Behavior of Bedform-Induced Hyporheic Exchange in Rivers. — Andrea Marion and Mattia Zaramella; 131(9), 1260-6 (2005).
Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Lagoons
Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Lakes
In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (2005).
Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).
Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Land reclamation
Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Landfills
Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).
Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).
Can Hazardous Waste Sites be Breached as a Result of Future Climate Change? — Timothy M. Kelly and John W. Winchester; 131(5), 810-4 (2005).
Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).
Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).
One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Leachates
Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (2005).

Leaching
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).
Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).

Lead
Effects of Weathering on Treatment of Lead Contaminated Soils. — Robert Stanforth, Chin-Foo Yap, and Rajeev Nayar; 131(1), 38-48 (2005).
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).

Lime
Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Liners
Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).

Load tests
Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Manganese
Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).
Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (2005).
Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (2005).

Marine clays
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).

Mass transfer
Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (2005).
Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).
Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).
Diffusional Mass Transfer at Sediment–Water Interface of Cylindrical Sediment Oxygen Demand Chamber. — Feleke Arega and Joseph H. W. Lee; 131(5), 755-66 (2005).

Mass transport
Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).

Mathematical models
Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).
In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (2005).
Rapid Calculation of Oxygen in Streams: Ap-

proximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).
Potential Improvement in Biofilter Design through the Use of Heterogeneous Packing and a Conical Biofilter Geometry. — He Yang and D. Grant Allen; 131(4), 504-11 (2005).
Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).
Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).
Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).
Full-Scale Application of a Dynamic Model for High-Rate Anaerobic Wastewater Treatment Systems. — Ian R. Ramsay and Pratap C. Pullammanappallil; 131(7), 1030-6 (2005).
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).
Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).
Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).
Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).
Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (2005).

Measurement

In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (2005).

Membrane processes

Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).
Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Crossflow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).

Membranes

Cometabolic Transformation of High Concentrations of 4-Chlorophenol in an Immobilized Cell Hollow Fiber Membrane Bioreactor. — Yi Li and Kai-Chee Loh; 131(9), 1285-92 (2005).
Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).
Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Metals

Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).
Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).
Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Methane

Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).
Combined Effects of Aging and Cosolvents on Sequestration of Phenanthrene in Soils. — An Li and Xiaoyu Liu; 131(7), 1068-72 (2005).
One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Microbes

Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).
Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).
Alternative Approaches to Modeling Fluence Distribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).
Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Microscopy

Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Mine drainage

Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).

Mine wastes

Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).

Mixed wastes

Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Mixing

Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Model accuracy

Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).

Model analysis

Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (2005).
Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Model studies

Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).

Model verification

Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).

Models

Modeling Steady-State Biofilms with Dual-Substrate Limitations. — Shaoying Qi and Eberhard Morgenroth; 131(2), 320-6 (2005).
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).
A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).
Alternative Approaches to Modeling Fluence Dis-

tribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).

Monitoring

Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (2005).

Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).

Montana

Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).

Monte Carlo method

Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (2005).

Mountain streams

Mountain Streams—Modeling Hydraulics and Substance Transport. — W. K. Meier and P. Reichert; 131(2), 252-61 (2005).

Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).

Municipal engineering

Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Municipal wastes

Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).

One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Natural gas

BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Neural networks

On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).

New Jersey

In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (2005).

Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).

New Zealand

Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).

Nitrates

Effects of Selected Good's pH Buffers on Nitrate Reduction by Iron Powder. — Tian C. Zhang and Yong H. Huang; 131(3), 461-70 (2005).

Enhancement of Nitrate Reduction in Fe^0-Packed Columns by Selected Cations. — Yong H. Huang and Tian C. Zhang; 131(4), 603-11 (2005).

Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).

Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Nitrification

Effect of Substrate Nitrogen/Chemical Oxygen Demand Ratio on the Formation of Aerobic Granules. — Shu-Fang Yang, Joo-Hwa Tay, and Yu Liu; 131(1), 86-92 (2005).

Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (2005).

Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).

Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).

Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (2005).

Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (2005).

Nitrogen

Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (2005).

Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).

Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Nitrogen oxide

Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Noises

Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).

Nonaqueous phase liquids

Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (2005).

Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (2005).

Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Nonlinear systems

Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).

Nonpoint pollution

Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).

Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

North America

Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Numerical analysis

Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (2005).

Numerical models
Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).
Numerical Computational Fluid Dynamics-Based Models of Ultraviolet Disinfection Channels. — D. A. Lyn and E. R. Blatchley, III; 131(6), 838-49 (2005).
Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).
Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).
Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (2005).

Nutrients
Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).
Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).
Diffusional Mass Transfer at Sediment–Water Interface of Cylindrical Sediment Oxygen Demand Chamber. — Feleke Arega and Joseph H. W. Lee; 131(5), 755-66 (2005).
Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).
Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).
Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).
Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Ohio
Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Oil
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

Oil spills
Effects of Clay Content and Temperature on Crude Oil (Nonvolatile Components) Transport in Unsaturated Soils: Centrifuge Study. — R. C. K. Wong; 131(10), 1473-8 (2005).

Oils
Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Open channels
Air–Water Mass Transfer on a Stepped Waterway. — L. Toombes and H. Chanson; 131(10), 1377-86 (2005).

Optimization
Potential Improvement in Biofilter Design through the Use of Heterogeneous Packing and a Conical Biofilter Geometry. — He Yang and D. Grant Allen; 131(4), 504-11 (2005).
Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).
Master Diagnostic Curve for Dispersion Coefficient of Soils. — Sushil K. Singh; 131(6), 988-93 (2005).
Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Organic carbon
Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Organic chemicals
Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).
Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).
Combined Effects of Aging and Cosolvents on Sequestration of Phenanthrene in Soils. — An Li and Xiaoyu Liu; 131(7), 1068-72 (2005).
Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (2005).

Organic compounds
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).
Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).
Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).
Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Organic loads
Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Organic matter
Combined Effects of Aging and Cosolvents on Sequestration of Phenanthrene in Soils. — An Li and Xiaoyu Liu; 131(7), 1068-72 (2005).
Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (2005).
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Organic matters
Biotransformation of Carbon Tetrachloride and Anaerobic Granulation in a Upflow Anaerobic Sludge Blanket Reactor. — Delia Teresa Sponza; 131(3), 425-33 (2005).

Osmosis
Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).
Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Overland flow
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Oxidation
Effect of Substrate Nitrogen/Chemical Oxygen Demand Ratio on the Formation of Aerobic Granules. — Shu-Fang Yang, Joo-Hwa Tay, and Yu Liu; 131(1), 86-92 (2005).
Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).
Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Hul-

ing, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).
Chemistry of Modified Fenton's Reagent (Catalyzed H_2O_2 Propagations–CHP) for In Situ Soil and Groundwater Remediation. — Richard J. Watts and Amy L. Teel; 131(4), 612-22 (2005).
Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).
Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).
Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (2005).
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).
Arsenite Oxidation by *Alcaligenes faecalis* Strain O1201. — Arthon Suttigarn and Yi-Tin Wang; 131(9), 1293-301 (2005).
Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).
Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (2005).
Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).

Oxygen

Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).
Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Oxygen demand

Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (2005).
Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).
Diffusional Mass Transfer at Sediment–Water Interface of Cylindrical Sediment Oxygen Demand Chamber. — Feleke Arega and Joseph H. W. Lee; 131(5), 755-66 (2005).

Oxygen transfer

Comparison of Oxygen Transfer Parameters Determined from the Steady State Oxygen Uptake Rate and the Non-Steady-State Changing Power Level Methods. — Venkatram Mahendraker, Donald S. Mavinic, and Kenneth J. Hall; 131(5), 692-701 (2005).
Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Oxygenation

Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).
Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (2005).

Ozone

Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Painting

Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).

Parameters

Arsenite Oxidation by *Alcaligenes faecalis* Strain O1201. — Arthon Suttigarn and Yi-Tin Wang; 131(9), 1293-301 (2005).

Particle motion

Numerical Computational Fluid Dynamics-Based Models of Ultraviolet Disinfection Channels. — D. A. Lyn and E. R. Blatchley, III; 131(6), 838-49 (2005).

Particle size

Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).
Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (2005).

Particle size distribution

Application of an Intraparticle Diffusion Model to Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).
Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Particles

Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).
Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Pathogens

Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).

PCB

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

PCE

Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).
Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).
Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Pennsylvania

Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Performance characteristics

Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).

Performance evaluation

Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Permeability

Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).
Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Sep-

tic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Pesticides

Degradation of Toxaphene by Zero-Valent Iron and Bimetallic Substrates. — Clayton J. Clark, II, Xiaosong Chen, and Seethu Babu; 131(12), 1733-9 (2005).

Petroleum

BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

pH

Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Phenol

Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).

Cometabolic Transformation of High Concentrations of 4-Chlorophenol in an Immobilized Cell Hollow Fiber Membrane Bioreactor. — Yi Li and Kai-Chee Loh; 131(9), 1285-92 (2005).

Modeling Cr(VI) Reduction and Phenol Degradation in a Coculture Biofilm Reactor. — Evans M. Nkhalambayausi-Chirwa and Yi-Tin Wang; 131(11), 1495-506 (2005).

Phosphate

Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Phosphorus

Using Polyphosphate Buffering to Treat Phosphorus-Deficient Wastewater. — Willie F. Harper, Jr.; 131(4), 563-9 (2005).

Comparison of Oxygen Transfer Parameters Determined from the Steady State Oxygen Uptake Rate and the Non-Steady-State Changing Power Level Methods. — Venkatram Mahendraker, Donald S. Mavinic, and Kenneth J. Hall; 131(5), 692-701 (2005).

Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).

Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (2005).

Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Photosynthesis

In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (2005).

Physical properties

Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Plankton

Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).

Point pollution

Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Pollutants

Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Biotransformation of Carbon Tetrachloride and Anaerobic Granulation in a Upflow Anaerobic Sludge Blanket Reactor. — Delia Teresa Sponza; 131(3), 425-33 (2005).

Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).

Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Pollution control

Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).

Polymers

Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).

Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).

Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).

Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Porosity

Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Potable water

Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).

Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Modeling Discoloration in Potable Water Distribution Systems. — J. B. Boxall and A. J. Saul; 131(5), 716-25 (2005).

Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Precipitation

Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).

Can Hazardous Waste Sites be Breached as a Result of Future Climate Change? — Timothy M. Kelly and John W. Winchester; 131(5), 810-4 (2005).

Study on Optimal Conditions for Recovery of EDTA from Soil Washing Effluents. — Irene M. C. Lo and Weihua Zhang; 131(11), 1507-13 (2005).

Predictions

Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Probabilistic methods

Evaluation of Probabilistic Point Estimate Methods in Uncertainty Analysis for Environmental Engineering Applications. — Christina W. Tsai and Samuela Franceschini; 131(3), 387-95 (2005).

Probability distribution
Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Public health
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).

Pyrite
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).

Rainfall
Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Reactors
A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).
Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).
Fate of Tolyltriazoles and Nonylphenol Ethoxylates in Upflow Anaerobic Sludge Blanket Reactors. — Pham thi Tham and Kevin J. Kennedy; 131(6), 892-900 (2005).
Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).
Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).
Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (2005).
Modeling Cr(VI) Reduction and Phenol Degradation in a Coculture Biofilm Reactor. — Evans M. Nkhalambayausi-Chirwa and Yi-Tin Wang; 131(11), 1495-506 (2005).
Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).
Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (2005).

Reaeration
Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).
Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).

Recycling
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).
Study on Optimal Conditions for Recovery of EDTA from Soil Washing Effluents. — Irene M. C. Lo and Weihua Zhang; 131(11), 1507-13 (2005).

Refuse disposal
Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).

Regeneration
BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).
Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Regression models
Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).
Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Regulations
Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Remedial action
Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).
Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (2005).
Effects of Selected Good's pH Buffers on Nitrate Reduction by Iron Powder. — Tian C. Zhang and Yong H. Huang; 131(3), 461-70 (2005).
Chemistry of Modified Fenton's Reagent (Catalyzed H_2O_2 Propagations–CHP) for In Situ Soil and Groundwater Remediation. — Richard J. Watts and Amy L. Teel; 131(4), 612-22 (2005).
Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).
Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).
Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).
Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).
Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).
Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).
Degradation of Toxaphene by Zero-Valent Iron and Bimetallic Substrates. — Clayton J. Clark, II, Xiaosong Chen, and Seethu Babu; 131(12), 1733-9 (2005).

Reservoirs
Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).
Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).

Residual strength
Protocol to Measure Network Strength of Sludges and Its Implications for Dewatering. — Banu Örmeci and Mohammad M. Abu-Orf; 131(1), 80-5 (2005).

Resins
Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Restoration
Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).

Retention
Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Retention time
Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).
Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).
Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Rheology
Protocol to Measure Network Strength of Sludges and Its Implications for Dewatering. — Banu Örmeci and Mohammad M. Abu-Orf; 131(1), 80-5 (2005).
Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).
Measuring Sludge Network Strength Using Rheology and Relation to Dewaterability, Filtra-

tion, and Thickening—Laboratory and Full-Scale Experiments. — Mohammad M. Abu-Orf and Banu Örmeci; 131(8), 1139-46 (2005).

Risk management

Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).

Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (2005).

River systems

Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Rivers

Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).

Diffusive Behavior of Bedform-Induced Hyporheic Exchange in Rivers. — Andrea Marion and Mattia Zaramella; 131(9), 1260-6 (2005).

Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Rotating biological contactor

Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Runoff

Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).

Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Salinity

Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).

Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).

Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (2005).

Sampling

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).

Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Sanitary sewers

Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Flow Data, Inflow/Infiltration Ratio, and Autoregressive Error Models. — Z. Zhang; 131(3), 343-9 (2005).

Saturation

Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (2005).

Sea water

Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).

Sediment

Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).

Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).

Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Diffusional Mass Transfer at Sediment–Water Interface of Cylindrical Sediment Oxygen Demand Chamber. — Feleke Arega and Joseph H. W. Lee; 131(5), 755-66 (2005).

Sediment concentration

Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Sediment discharge

Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Sediment load

Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Sediment transport

Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Sedimentation

Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (2005).

Sedimentation tanks

Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Sensitivity analysis

Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Sensors

Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (2005).

Sequencing batch reactor

Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Sequencing batch reactors

Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).

Settlement

Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).

Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).

Settling velocity

Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Evaluation of Probabilistic Point Estimate Methods in Uncertainty Analysis for Environmental Engineering Applications. — Christina W. Tsai and Samuela Franceschini; 131(3), 387-95 (2005).

Sewage

Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).

Sewers
Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).

Shape
Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Simulation
Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).
Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).
Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (2005).

Simulation models
Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Skimming
Clarifier Scum Removal Can Be Both Simple and Efficient. — Orris E. Albertson; 131(2), 225-31 (2005).

Sludge
Protocol to Measure Network Strength of Sludges and Its Implications for Dewatering. — Banu Örmeci and Mohammad M. Abu-Orf; 131(1), 80-5 (2005).
Anaerobic Degradation of Sulfate Laden Organics Employing Different Reactor System Configurations. — S. K. Patidar and Vinod Tare; 131(2), 216-24 (2005).
Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).
Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).
Measuring Sludge Network Strength Using Rheology and Relation to Dewaterability, Filtration, and Thickening—Laboratory and Full-Scale Experiments. — Mohammad M. Abu-Orf and Banu Örmeci; 131(8), 1139-46 (2005).
Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).

Sludge disposal
Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).
Estimating Solar and Nonsolar Inactivation Rates of Airborne Bacteria. — Tania Paez-Rubio and Jordan Peccia; 131(4), 512-7 (2005).
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).

Sludge treatment
Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).
Biotransformation of Carbon Tetrachloride and Anaerobic Granulation in a Upflow Anaerobic Sludge Blanket Reactor. — Delia Teresa Sponza; 131(3), 425-33 (2005).
Comparison of Oxygen Transfer Parameters Determined from the Steady State Oxygen Uptake Rate and the Non-Steady-State Changing Power Level Methods. — Venkatram Mahendraker, Donald S. Mavinic, and Kenneth J. Hall; 131(5), 692-701 (2005).

Snow
Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Snowmelt
Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Social factors
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Soil chemistry
Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Soil dispersion
Master Diagnostic Curve for Dispersion Coefficient of Soils. — Sushil K. Singh; 131(6), 988-93 (2005).

Soil pollution
Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).
Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).
Chemistry of Modified Fenton's Reagent (Catalyzed H_2O_2 Propagations–CHP) for In Situ Soil and Groundwater Remediation. — Richard J. Watts and Amy L. Teel; 131(4), 612-22 (2005).
2,4,6-Trinitrotoluene Transformation Using Spinacia Oleracea: Saturation Kinetics of the Nitrate Reductase Enzyme. — Clinton P. Richardson and Enric Bonmati; 131(5), 800-9 (2005).
Application of an Intraparticle Diffusion Model to Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).
Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).
Combined Effects of Aging and Cosolvents on Sequestration of Phenanthrene in Soils. — An Li and Xiaoyu Liu; 131(7), 1068-72 (2005).
Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).
Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).

Soil treatment
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).
Effects of Weathering on Treatment of Lead Contaminated Soils. — Robert Stanforth, Chin-Foo Yap, and Rajeev Nayar; 131(1), 38-48 (2005).
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).
Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).
2,4,6-Trinitrotoluene Transformation Using Spinacia Oleracea: Saturation Kinetics of the Nitrate Reductase Enzyme. — Clinton P. Richardson and Enric Bonmati; 131(5), 800-9 (2005).

Soil water
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).
Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (2005).

Soils
Study on Optimal Conditions for Recovery of EDTA from Soil Washing Effluents. — Irene M. C. Lo and Weihua Zhang; 131(11), 1507-13 (2005).

Solar energy
Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (2005).

Solar radiation
Estimating Solar and Nonsolar Inactivation Rates of Airborne Bacteria. — Tania Paez-Rubio and Jordan Peccia; 131(4), 512-7 (2005).

Solid waste disposal
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Solid wastes
Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).

Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).

Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).

Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).

One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Solids flow
Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Solutes
Diffusive Behavior of Bedform-Induced Hyporheic Exchange in Rivers. — Andrea Marion and Mattia Zaramella; 131(9), 1260-6 (2005).

Sorption
Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).

BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Fate of Tolyltriazoles and Nonylphenol Ethoxylates in Upflow Anaerobic Sludge Blanket Reactors. — Pham thi Tham and Kevin J. Kennedy; 131(6), 892-900 (2005).

Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).

Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Statistical models
Flow Data, Inflow/Infiltration Ratio, and Autoregressive Error Models. — Z. Zhang; 131(3), 343-9 (2005).

Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Statistics
Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).

Storage tanks
Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Storm runoff
Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).

Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Stormwater
Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).

Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Stormwater management
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Stratification
Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).

Stratified flow
Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).

Streams
Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).

Subsurface environment
Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).

Subsurface flow
Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Sulfates
Anaerobic Degradation of Sulfate Laden Organics Employing Different Reactor System Configurations. — S. K. Patidar and Vinod Tare; 131(2), 216-24 (2005).

Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

Surface-active agents
Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Suspended solids
Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Switzerland
Mountain Streams—Modeling Hydraulics and Substance Transport. — W. K. Meier and P. Reichert; 131(2), 252-61 (2005).

Tailings
Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).

Taiwan
Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).

TCE

Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).

Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-606 (2005).

Temperature

Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).

Effects of Clay Content and Temperature on Crude Oil (Nonvolatile Components) Transport in Unsaturated Soils: Centrifuge Study. — R. C. K. Wong; 131(10), 1473-8 (2005).

Temperature effects

Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Tension

Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).

Terrorism

Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).

Three-dimensional models

Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Toxic wastes

Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).

Toxicity

Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (2005).

Arsenite Oxidation by *Alcaligenes faecalis* Strain O1201. — Arthon Suttigarn and Yi-Tin Wang; 131(9), 1293-301 (2005).

Tracers

Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (2005).

Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Transient loads

Using Polyphosphate Buffering to Treat Phosphorus-Deficient Wastewater. — Willie F. Harper, Jr.; 131(4), 563-9 (2005).

Transient Response of Flow-Direction-Switching Vapor-Phase Biofilters. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(7), 999-1009 (2005).

Trihalomethanes

Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Tropical regions

Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).

Turbidity

Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).

Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).

Turbulence

Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Ultrasonic methods

Numerical Computational Fluid Dynamics-Based Models of Ultraviolet Disinfection Channels. — D. A. Lyn and E. R. Blatchley, III; 131(6), 838-49 (2005).

Ultraviolet radiation

A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).

Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).

Alternative Approaches to Modeling Fluence Distribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).

Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).

Uncertainty analysis

Evaluation of Probabilistic Point Estimate Methods in Uncertainty Analysis for Environmental Engineering Applications. — Christina W. Tsai and Samuela Franceschini; 131(3), 387-95 (2005).

Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Uncertainty principles

Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (2005).

United Kingdom

Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).

Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Unsaturated flow

Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Effects of Clay Content and Temperature on Crude Oil (Nonvolatile Components) Transport in Unsaturated Soils: Centrifuge Study. — R. C. K. Wong; 131(10), 1473-8 (2005).

Urban areas

Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Urban runoff

Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).

Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Vadose zone

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).

Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).

Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (2005).

Vapor

Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).

Vehicles

Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).

Velocity

Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).

Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Ventilation

Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (2005).

Verification

Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Viruses

Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Volatile organic chemicals

Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).

Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Volatile organic compounds

Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Volatilization

Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Washing

Study on Optimal Conditions for Recovery of EDTA from Soil Washing Effluents. — Irene M. C. Lo and Weihua Zhang; 131(11), 1507-13 (2005).

Waste management

Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).

Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).

Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).

Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Waste stabilization ponds

Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Waste treatment

Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (2005).

Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).

Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).

Wastewater

On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).

Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Wastewater disposal

Factors Affecting Inactivation Behavior in the Monochloramination Range. — Chii Shang, Yinan Qi, and Irene M. C. Lo; 131(1), 119-29 (2005).

Wastewater management

Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Effect of Adsorbent Particle Layering on Performance of Conventional and Tapered Fixed-Bed Adsorbers. — Alexander P. Mathews; 131(11), 1488-94 (2005).

Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).

Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Dual Conditioning of Sludge Utilizing Polyampholyte. — J. S. Wang, J. C. Liu, and D. J. Lee; 131(12), 1659-66 (2005).

Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Sep-

tic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).

Wastewater treatment

Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Effect of Substrate Nitrogen/Chemical Oxygen Demand Ratio on the Formation of Aerobic Granules. — Shu-Fang Yang, Joo-Hwa Tay, and Yu Liu; 131(1), 86-92 (2005).

Factors Affecting Inactivation Behavior in the Monochloramination Range. — Chii Shang, Yinan Qi, and Irene M. C. Lo; 131(1), 119-29 (2005).

Clarifier Scum Removal Can Be Both Simple and Efficient. — Orris E. Albertson; 131(2), 225-31 (2005).

Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

Modeling Steady-State Biofilms with Dual-Substrate Limitations. — Shaoying Qi and Eberhard Morgenroth; 131(2), 320-6 (2005).

Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).

Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).

Using Polyphosphate Buffering to Treat Phosphorus-Deficient Wastewater. — Willie F. Harper, Jr.; 131(4), 563-9 (2005).

Utilization of an Activated Sludge for the Improvement of an Existing Thermophilic Wastewater Treatment System. — David Quesnel and George Nakhla; 131(4), 570-8 (2005).

Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (2005).

Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).

Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Fate of Tolyltriazoles and Nonylphenol Ethoxylates in Upflow Anaerobic Sludge Blanket Reactors. — Pham thi Tham and Kevin J. Kennedy; 131(6), 892-900 (2005).

Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).

Full-Scale Application of a Dynamic Model for High-Rate Anaerobic Wastewater Treatment Systems. — Ian R. Ramsay and Pratap C. Pullammanappallil; 131(7), 1030-6 (2005).

Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).

Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Water analysis

Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Water chemistry

Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Water content

Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Water distribution

Modeling Discoloration in Potable Water Distribution Systems. — J. B. Boxall and A. J. Saul; 131(5), 716-25 (2005).

Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Water hammer

Waterhammer Analysis—Essential and Easy (and Efficient). — Don J. Wood; 131(8), 1123-31 (2005).

Water pipelines

Waterhammer Analysis—Essential and Easy (and Efficient). — Don J. Wood; 131(8), 1123-31 (2005).

Water pollution

Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).

Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Effects of Selected Good's pH Buffers on Nitrate Reduction by Iron Powder. — Tian C. Zhang and Yong H. Huang; 131(3), 461-70 (2005).

Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).

Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Estimating Nutrient Outflow from Agricultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Water quality

Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Mountain Streams—Modeling Hydraulics and Substance Transport. — W. K. Meier and P. Reichert; 131(2), 252-61 (2005).

Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).

Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).

Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).

Modeling Discoloration in Potable Water Distribution Systems. — J. B. Boxall and A. J. Saul; 131(5), 716-25 (2005).

Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).

Air–Water Mass Transfer on a Stepped Waterway. — L. Toombes and H. Chanson; 131(10), 1377-86 (2005).

Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects

on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).

Water reclamation

Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (2005).

Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Water resources management

Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Water reuse

Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (2005).

A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).

Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Water temperature

Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Water treatment

Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).

Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).

Modeling Steady-State Biofilms with Dual-Substrate Limitations. — Shaoying Qi and Eberhard Morgenroth; 131(2), 320-6 (2005).

Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Effects of Selected Good's pH Buffers on Nitrate Reduction by Iron Powder. — Tian C. Zhang and Yong H. Huang; 131(3), 461-70 (2005).

Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (2005).

Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).

A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).

Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Crossflow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).

Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).

Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (2005).

Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (2005).

Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Effect of Adsorbent Particle Layering on Performance of Conventional and Tapered Fixed-Bed Adsorbers. — Alexander P. Mathews; 131(11), 1488-94 (2005).

Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (2005).

Water treatment plants

Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (2005).

Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Watershed management

Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Watersheds

Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Waterways

Air–Water Mass Transfer on a Stepped Waterway. — L. Toombes and H. Chanson; 131(10), 1377-86 (2005).

Weathering

Effects of Weathering on Treatment of Lead Contaminated Soils. — Robert Stanforth, Chin-Foo Yap, and Rajeev Nayar; 131(1), 38-48 (2005).

Wetlands

Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

Wind tunnels

Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Wind waves

Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Zeolite

Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (2005).

Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Author Index

Abu-Orf, Mohammad M.
Protocol to Measure Network Strength of Sludges and Its Implications for Dewatering. — Banu Örmeci and Mohammad M. Abu-Orf; 131(1), 80-5 (2005).
Measuring Sludge Network Strength Using Rheology and Relation to Dewaterability, Filtration, and Thickening—Laboratory and Full-Scale Experiments. — Mohammad M. Abu-Orf and Banu Örmeci; 131(8), 1139-46 (2005).

Adams, C.
Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).
Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (T) (2005).

Adams, Craig
Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).

Adham, Samer
Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Adrian, Donald Dean
Closure to "Oxygen Sag Models for Multiorder Biochemical Oxygen Demand Reactions" by Donald Dean Adrian, Emerald M. Roider, and Thomas G. Sanders. — Donald Dean Adrian, Emerald M. Roider, and Thomas G. Sanders; 131(12), 1760-1 (2005).

Aivasidis, A.
Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (T) (2005).

Aizpuru, Aitor
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Albertson, Orris E.
Clarifier Scum Removal Can Be Both Simple and Efficient. — Orris E. Albertson; 131(2), 225-31 (2005).

Allen, Martin J.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Amburgey, James E.
Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).

Amirtharajah, Appiah
Strategic Filter Backwashing Techniques and Resulting Particle Passage. — James E. Amburgey and Appiah Amirtharajah; 131(4), 535-47 (2005).

Amy, Gary
Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).

Antia, Jimmy E.
Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Antoniou, Maria G.
Cyanotoxins: New Generation of Water Contaminants. — Maria G. Antoniou, Armah A. de la Cruz, and Dionysios D. Dionysiou; 131(9), 1239-43 (2005).

Arega, Feleke
Diffusional Mass Transfer at Sediment–Water Interface of Cylindrical Sediment Oxygen Demand Chamber. — Feleke Arega and Joseph H. W. Lee; 131(5), 755-66 (2005).

Arnold, Robert G.
Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).

Aronson, Arthur I.
Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).

Ashley, Richard
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Auclair, Jean Christian
Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Audic, Jean M.
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Auria, Richard
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Ayol, Azize
Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).

Ayora, Carles
Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).

Babarutsi, S.
Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Babcock, Roger W., Jr.
Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (T) (2005).

Babu, Seethu
Degradation of Toxaphene by Zero-Valent Iron and Bimetallic Substrates. — Clayton J. Clark, II, Xiaosong Chen, and Seethu Babu; 131(12), 1733-9 (2005).

Badruzzaman, Md.
Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (T) (2005).

Badruzzaman, Mohammad
Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).

Bagchi, Rajesh
Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Baker, Lawrence
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Bales, Roger C.
Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Ballard, Bill D.
Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).

Bandyopadhyay, S.
Design Characteristics of Single Hub Paddle Wheel Aerator. — Sanjib Moulick, S. Bandyopadhyay, and B. C. Mal; 131(8), 1147-54 (2005).

Banks, M. Kathy
Ripples of Change. — M. Kathy Banks; 131(1), 2 (2005).
Editor's Note. — M. Kathy Banks; 131(1), 3 (2005).
Editor's Note. — M. Kathy Banks; 131(2), 175 (2005).
Editor's Note. — M. Kathy Banks; 131(3), 335 (2005).
Editor's Note. — Kathy Banks; 131(4), 503 (2005).
Editor's Note. — M. Kathy Banks; 131(5), 666 (2005).
Editor's Note. — M. Kathy Banks; 131(6), 833 (2005).
Editor's Note. — M. Kathy Banks; 131(7), 998 (2005).
Editor's Note. — M. Kathy Banks; 131(8), 1122 (2005).
Editor's Note. — M. Kathy Banks; 131(10), 1360 (2005).
Editor's Note. — M. Kathy Banks; 131(11), 1480 (2005).
Editor's Note. — M. Kathy Banks; 131(12), 1620 (2005).

Banks, Margaret Katherine
Editor's Note. — Margaret Katherine Banks; 131(9), 1244 (2005).

Bardin, Jean-Pascal
Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Barlaz, Morton A.
Honesty in Publication. — Morton A. Barlaz; 131(5), 665 (2005).

Barraud, Sylvie
Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Bassi, Amarjeet S.
Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (T) (2005).

Baudrit, Cédric
Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (T) (2005).

Beccari, M.
Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Ben Cheikh, Ridha
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).

Bendick, John A.
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Benmoussa, Hamel
Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Bhandari, Alok
Case Studies Can Fill a Critical Need in Environmental Engineering Education. — Alok Bhandari and Larry E. Erickson; 131(8), 1121 (2005).

Bhargava, Renu
Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).
Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).

Bhatia, K. K. S.
Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Bielefeldt, Angela R.
Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Bishop, Paul L.
Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Biswas, Susham
Zero-Valent Iron-Assisted Autotrophic Denitrification. — Susham Biswas and Purnendu Bose; 131(8), 1212-20 (2005).

Blackwood, David
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Blais, Jean-François
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).
Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Blatchley, E. R., III
Numerical Computational Fluid Dynamics-Based Models of Ultraviolet Disinfection Channels. — D. A. Lyn and E. R. Blatchley, III; 131(6), 838-49 (2005).

Blatchley, Ernest R., III
Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).

Bolton, James R.
Discussion of "Standardized Collimated Beam Testing Protocol for Water/Wastewater Ultraviolet Disinfection" by Jeff Kuo, Ching-lin Chen, and Margaret Nellor. — James R. Bolton and Karl G. Linden; 131(5), 827 (2005).

Bonmati, Enric
2,4,6-Trinitrotoluene Transformation Using Spinacia Oleracea: Saturation Kinetics of the Nitrate Reductase Enzyme. — Clinton P. Richardson and Enric Bonmati; 131(5), 800-9 (2005).

Bose, Purnendu
Zero-Valent Iron-Assisted Autotrophic Denitrification. — Susham Biswas and Purnendu Bose; 131(8), 1212-20 (2005).

Bowman, Robert S.
BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).
Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Boxall, J. B.
Modeling Discoloration in Potable Water Distribution Systems. — J. B. Boxall and A. J. Saul; 131(5), 716-25 (2005).

Brewster, Jamie
Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Brewster, Lindsay
Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).

Brezonik, Patrick L.
The Collaborative Large-Scale Engineering Analysis Network for Environmental Research-Hydrologic Observatory Network: A Vision for Transforming Environmental Research. — Patrick L. Brezonik; 131(11), 1479 (2005).

Britton, Andrew
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Brown, Michael J.
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Buchberger, Steven G.
Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Burian, Steven J.
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Burken, Joel G.
Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Burt, Todd A.
Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Butler, David
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Cai, Zhangli
Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Cama, Jordi
Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).

Cameron, Richard J.
Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (T) (2005).

Carlon, David B.
Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

Carrasco, F.
Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Cartledge, Frank K.
Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).
Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).
Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Carucci, G.
Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Caruso, Brian S.
Simulation of Metals Total Maximum Daily Loads and Remediation in a Mining-Impacted Stream. — Brian S. Caruso; 131(5), 777-89 (2005).

Cass, Glen R.
Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Casson, Leonard W.
Water and Wastewater Infrastructure Security Issues: Impacts on Environmental Engineering Research and Design. — Leonard W. Casson; 131(10), 1359 (2005).

Çelik, Mehmet S.
Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (T) (2005).

Cerco, Carl F.
Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).

Champlin, Tory L.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Chang, Daniel P. Y.
Transient Response of Flow-Direction-Switching Vapor-Phase Biofilters. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(7), 999-1009 (2005).
Regular Transient Loading Response in a Vapor-Phase Flow-Direction-Switching Biofilter. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(12), 1649-58 (2005).

Chang, James-I
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Chang, Seokheung
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Chang, Shoou-Yuh
Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).

Chanson, H.
Air–Water Mass Transfer on a Stepped Waterway. — L. Toombes and H. Chanson; 131(10), 1377-86 (2005).

Chao, Huan-Ping
Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Chapra, Steven C.
Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).

Chatterjee, Sabyasachi
Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Chaudhuri, Malay
Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (T) (2005).

Chen, Carl W.
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Chen, Ching-lin
Closure to "Standardized Collimated Beam Testing Protocol for Water/Wastewater Ultraviolet Disinfection" by Jeff Kuo, Ching-lin Chen, and Margaret Nellor. — Jeff Kuo, Ching-lin Chen, and Margaret Nellor; 131(5), 828-9 (2005).
—131(5), 829-30 (2005).

Chen, Xiaosong
Degradation of Toxaphene by Zero-Valent Iron and Bimetallic Substrates. — Clayton J. Clark, II, Xiaosong Chen, and Seethu Babu; 131(12), 1733-9 (2005).

Chen, XinJian
Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Cheng, Wen-Po
On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).

Chien, Chao-Yu
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).

Choi, Eung-soo
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Chou, Hsin-Hsien
Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).

Christen, Pierre
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Christoforou, Christos S.
Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Chu, Mei-Ling
On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).

Cicek, Nazim
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Clark, Clayton J., II
Degradation of Toxaphene by Zero-Valent Iron and Bimetallic Substrates. — Clayton J. Clark, II, Xiaosong Chen, and Seethu Babu; 131(12), 1733-9 (2005).

Clarke, William
Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Clary, Jane K.
Urban Storm-Water Regulations—Are Impervious Area Limits a Good Idea? — Jonathan E. Jones, T. Andrew Earles, Elizabeth A. Fassman, Edwin E. Herricks, Ben Urbonas, and Jane K. Clary; 131(2), 176-9 (2005).

Clausen, Christian A.
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Clunie, William F.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Collins, Michelle M.
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Conklin, Martha H.
Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Conlin, Jim
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Cook, Andrew
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Coombs, Kevin M.
Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Cooper, C. David
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Corapcioglu, M. Yavuz
Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).

Cox, Brian A.
Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Cox, Chris D.
Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).

Craig, James R.
Analytical Models for the Design of Iron-Based Permeable Reactive Barriers. — Alan J. Rabideau, Raghavendra Suribhatla, and James R. Craig; 131(11), 1589-97 (2005).

Crimi, Michelle L.
Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).

Cristina, Chad M.
Closure to "Kinematic Wave Model of Urban Pavement Runoff Subject to Traffic Loadings" by Chad M. Cristina and John J. Sansalone. — Chad M. Cristina and John J. Sansalone; 131(1), 170 (2005).

Crohn, David M.
Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

Cundy, T.
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Davel, Jan
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Davies, John
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Davis, Allen P.
Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Dean, Christopher M.
Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).

Dechesne, Magali
Experimental Assessment of Stormwater Infiltration Basin Evolution. — Magali Dechesne, Sylvie Barraud, and Jean-Pascal Bardin; 131(7), 1090-8 (2005).

Decruyenaere, Joseph G.
Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

de la Cruz, Armah A.
Cyanotoxins: New Generation of Water Contaminants. — Maria G. Antoniou, Armah A. de la Cruz, and Dionysios D. Dionysiou; 131(9), 1239-43 (2005).

Delatolla, R. A.
Parameters Affecting Hydraulic Behavior of Aerated Lagoons. — R. A. Delatolla and S. Babarutsi; 131(10), 1404-13 (2005).

Deletic, Ana
Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).

de Lima, João L. M. P.
Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Deng, Zhi-Qiang
Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Dentel, Steven K.
Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).

Dietz, J. D.
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Dietz, John D.
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Dionysiou, Dionysios D.
Cyanotoxins: New Generation of Water Contaminants. — Maria G. Antoniou, Armah A. de la Cruz, and Dionysios D. Dionysiou; 131(9), 1239-43 (2005).

Djedidi, Zied
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).

Doye, Isabelle
Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).
Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).

Drewes, Jörg E.
Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Drogui, Patrick
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).
Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Drori, U.
Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (T) (2005).

Dubois, Didier
Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (T) (2005).

Dubovsky, V.
Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (T) (2005).

Duchesne, Josée
Column Leaching Test to Evaluate the Use of Alkaline Industrial Wastes to Neutralize Acid Mine Tailings. — Isabelle Doye and Josée Duchesne; 131(8), 1221-9 (2005).
Effectiveness of Covers and Liners Made of Red Mud Bauxite and/or Cement Kiln Dust for Limiting Acid Mine Drainage. — Josée Duchesne and Isabelle Doye; 131(8), 1230-5 (2005).

Ducoste, Joel J.
Alternative Approaches to Modeling Fluence Distribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).

Dunat, Bertrand
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Dunkerley, Judith
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Duran, Metin
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).

Durmusoglu, Ertan
Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).

Dvorak, Bruce I.
Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (T) (2005).

Dzombak, David A.
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

Earles, T. Andrew
Urban Storm-Water Regulations—Are Impervious Area Limits a Good Idea? — Jonathan E. Jones, T. Andrew Earles, Elizabeth A. Fassman, Edwin E. Herricks, Ben Urbonas, and Jane K. Clary; 131(2), 176-9 (2005).

Ela, Wendell P.
Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).
Environmental Engineering: Training for the Next Round. — Wendell P. Ela; 131(6), 831-2 (2005).

El Fadel, M.
Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).

Erickson, Larry E.
Case Studies Can Fill a Critical Need in Environmental Engineering Education. — Alok Bhandari and Larry E. Erickson; 131(8), 1121 (2005).

Esparza-Soto, Mario
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Evans, John C.
Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (T) (2005).

Fan, Kuo-Shuh
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Fassman, Elizabeth A.
Urban Storm-Water Regulations—Are Impervious Area Limits a Good Idea? — Jonathan E. Jones, T. Andrew Earles, Elizabeth A. Fassman, Edwin E. Herricks, Ben Urbonas, and Jane K. Clary; 131(2), 176-9 (2005).

Fenner, Richard A.
A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).

Filibeli, Ayse
Dual Polymer Conditioning of Water Treatment Residuals. — Azize Ayol, Steven K. Dentel, and Ayse Filibeli; 131(8), 1132-8 (2005).

Flora, Joseph R. V.
Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).
Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (T) (2005).

Fouad, Moharram
Sludge Production and Settleability in Biofilm-Activated Sludge Process. — Moharram Fouad and Renu Bhargava; 131(3), 417-24 (2005).
Mathematical Model for the Biofilm–Activated Sludge Reactor. — Moharram Fouad and Renu Bhargava; 131(4), 557-62 (2005).

Franceschini, Samuela
Evaluation of Probabilistic Point Estimate Methods in Uncertainty Analysis for Environmental Engineering Applications. — Christina W. Tsai and Samuela Franceschini; 131(3), 387-95 (2005).

Frederiksen, Harald D.
Addressing Water Crisis in Developing Countries. — Harald D. Frederiksen; 131(5), 667-75 (2005).

Freedman, David L.
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).

Fulp, Terrance J.
Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).

Gantzer, Charles J.
Closure to "Periodic Diffusional Mass Transfer Near Sediment/Water Interface: Theory" by Makoto Higashino, Heinz G. Stefan, and Charles J. Gantzer. — Makoto Higashino, Heinz G. Stefan, and Charles J. Gantzer; 131(1), 173 (2005).

García-Peña, Inés
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Ghosh, Upal
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

Gijzen, H. J.
Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Gin, Karina Yew-Hoong
Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).

Ginestet, Philippe
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Goel, Ramesh
Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).
Stimulating Biological Nitrification via Electrolytic Oxygenation. — Ramesh Goel and Joseph R. V. Flora; 131(11), 1607-13 (T) (2005).

Goldie, Peter
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Goldstein, R. A.
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Graber, S. David
Discussion of "Computational Study of Particle-Eddy Interaction in Sedimentation Tanks" by S. Jayanti and S. Narayanan. — S. David Graber; 131(6), 994 (2005).

Graham-Eagle, J.
Closure to "A Model of Coupled Heat and Moisture Transport in an Annular Clay Barrier" by L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell. — L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell; 131(11), 1615-6 (2005).

Grant Allen, D.
Potential Improvement in Biofilter Design through the Use of Heterogeneous Packing and a Conical Biofilter Geometry. — He Yang and D. Grant Allen; 131(4), 504-11 (2005).

Gualtieri, Carlo
Discussion of "Periodic Diffusional Mass Transfer Near Sediment/Water Interface: Theory" by Makoto Higashino, Heinz G. Stefan, and Charles J. Gantzer. — Carlo Gualtieri; 131(1), 171-2 (2005).
Discussion of "Wind and Stream Flow Induced Reaeration" by Chia R. Chua and Gerhard H. Jirka. — Carlo Gualtieri; 131(8), 1236-8 (2005).

Gulsen, Hakki
Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (T) (2005).

Gupta, Sarika
Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (T) (2005).

Guyonnet, Dominique
Postprocessing the Hybrid Method for Addressing Uncertainty in Risk Assessments. — Cédric Baudrit, Dominique Guyonnet, and Didier Dubois; 131(12), 1750-4 (T) (2005).

Haghighi, Kamyar
Systematic and Sustainable Reform in Engineering Education. — Kamyar Haghighi; 131(4), 501-2 (2005).

Hall, Kenneth J.
Comparison of Oxygen Transfer Parameters Determined from the Steady State Oxygen Uptake Rate and the Non-Steady-State Changing Power Level Methods. — Venkatram Mahendraker, Donald S. Mavinic, and Kenneth J. Hall; 131(5), 692-701 (2005).

Han, Chonghun
Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Harper, Willie F., Jr.
Using Polyphosphate Buffering to Treat Phosphorus-Deficient Wastewater. — Willie F. Harper, Jr.; 131(4), 563-9 (2005).

Harrison, Kenneth W.
If You've Ever Used Engineering Judgment, You Just Might Be a Bayesian. — Kenneth W. Harrison; 131(3), 333-4 (2005).

Haznedaroğlu, Berat Z.
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).

He, Jiahan
Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Head, M. A.
Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).

Heiser, John
Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Hendricks, David W.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Hendry, Sarah
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Henke, Jennifer L.
Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

Henry, Bruce
Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Her, Namguk
Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).

Herr, J. W.
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Herricks, Edwin E.
Urban Storm-Water Regulations—Are Impervious Area Limits a Good Idea? — Jonathan E. Jones, T. Andrew Earles, Elizabeth A. Fassman, Edwin E. Herricks, Ben Urbonas, and Jane K. Clary; 131(2), 176-9 (2005).

Higashino, Makoto
Closure to "Periodic Diffusional Mass Transfer Near Sediment/Water Interface: Theory" by Makoto Higashino, Heinz G. Stefan, and Charles J. Gantzer. — Makoto Higashino, Heinz G. Stefan, and Charles J. Gantzer; 131(1), 173 (2005).
Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).

Highfield, David
Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).

Hilts, Brian A.
Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (T) (2005).

Hirsch, Julie
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Holakoo, Ladan
Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (T) (2005).

Hong, Sze-Yunn
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).

Hooper, Richard P.
Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Howsawkeng, Jimmy
Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (T) (2005).

Hsieh, Chi-hsu
Evaluation and Optimization of Bioretention Media for Treatment of Urban Storm Water Runoff. — Chi-hsu Hsieh and Allen P. Davis; 131(11), 1521-31 (2005).

Hsu, Cheng-non
Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).

Hsu, Ping-Chi
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Hsu, Tsung-Ming
Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (T) (2005).

Hu, Eric
Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).

Hu, J. Y.
Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Hu, Qiang
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Huang, Cheng-Hsiung
Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Huang, Chihpin
Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).

Huang, Hui-Chen
Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Huang, Ju-Chang
Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).

Huang, Ju-Sheng
Role of Mass Transfer Resistance in Overall Substrate Removal Rate in Upflow Anaerobic Sludge Bed Reactors. — Hsin-Hsien Chou and Ju-Sheng Huang; 131(4), 548-56 (2005).

Huang, Xinjiang
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Huang, Yong H.
Effects of Selected Good's pH Buffers on Nitrate Reduction by Iron Powder. — Tian C. Zhang and Yong H. Huang; 131(3), 461-70 (2005).
Enhancement of Nitrate Reduction in Fe^0-Packed Columns by Selected Cations. — Yong H. Huang and Tian C. Zhang; 131(4), 603-11 (2005).
Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Hughes-Strange, George B.
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).

Huh, Wan-wook
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Huling, Scott G.
Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).

Hull, Ross M.
Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).

Hunt, D. John
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Hunter, John G.
In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (T) (2005).

Hussaini, M. Y.
Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).

Hvitved-Jacobsen, Thorkild
Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).
Discussion of "Modeling Hydrogen Sulfide Emission Rates in Gravity Sewage Collection Systems" by Ori Lahav, Yue Lu, Uri Shavit, and Richard E. Loewenthal. — Asbjørn Haaning Nielsen, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1761-2 (2005).

Hwang, Jieng-I
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Ice, G.
Retrospective Comparison of Watershed Analysis Risk Management Framework and Hydrologic Simulation Program Fortran Applications to Mica Creek Watershed. — Carl W. Chen, J. W. Herr, R. A. Goldstein, G. Ice, and T. Cundy; 131(9), 1277-84 (2005).

Illangasekare, Tissa
Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Imran, S. A.
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Inyang, H. I.
Closure to "A Model of Coupled Heat and Moisture Transport in an Annular Clay Barrier" by L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell. — L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell; 131(11), 1615-6 (2005).

Inyang, Hilary I.
Closure to "On Models, Modeling, and Modelers in the Environmental Arena" by Hilary I. Inyang. — Hilary I. Inyang; 131(3), 497-500 (2005).

Jain, Pradeep
Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).
One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Jha, Ramakar
Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Jin, An
Kalman Filtering with Regional Noise to Improve Accuracy of Contaminant Transport Models. — Shoou-Yuh Chang and An Jin; 131(6), 971-82 (2005).

Jin, Yee-Chung
Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (T) (2005).

Jones, Jonathan E.
Urban Storm-Water Regulations—Are Impervious Area Limits a Good Idea? — Jonathan E. Jones, T. Andrew Earles, Elizabeth A. Fassman, Edwin E. Herricks, Ben Urbonas, and Jane K. Clary; 131(2), 176-9 (2005).

Jones, Patrick K.
Repeated Reductive and Oxidative Treatments of Granular Activated Carbon. — Scott G. Huling, Patrick K. Jones, Wendell P. Ela, and Robert G. Arnold; 131(2), 287-97 (2005).

Jönsson, Lennart
Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).

Joo, Jin Chul
Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).

Kargbo, David M.
Stability of Silicate Coatings on Pyrite Surfaces in a Low pH Environment. — David M. Kargbo and Sabyasachi Chatterjee; 131(9), 1340-9 (2005).

Karimi-Jashni, Ayoub
Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Karney, B. W.
Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Katz, Lynn E.
BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Kayhanian, Masoud
Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Kaysi, I.
Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).

Kazopoulo, M.
Emission Standards Development for an Inspection/Maintenance Program. — M. Kazopoulo, M. El Fadel, and I. Kaysi; 131(9), 1330-9 (2005).

Kekobad, Jamshid
Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).

Kelly, Timothy M.
Can Hazardous Waste Sites be Breached as a Result of Future Climate Change? — Timothy M. Kelly and John W. Winchester; 131(5), 810-4 (T) (2005).

Kennedy, Kevin J.
Fate of Tolyltriazoles and Nonylphenol Ethoxylates in Upflow Anaerobic Sludge Blanket Reactors. — Pham thi Tham and Kevin J. Kennedy; 131(6), 892-900 (2005).

Khan, Eakalak
Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (T) (2005).

Khodadoust, Amid P.
Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Kim, Daekeun
Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Kim, Jae Young
Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).

Kim, Minjin
Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Kim, Suhan
Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Crossflow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).

Kindle, Betty Jo
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Kinney, Kerry A.
Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).

Klein, Donald A.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Komvuschara, Kanyarat
A New Kinetic Model for Ultraviolet Disinfection of Greywater. — Richard A. Fenner and Kanyarat Komvuschara; 131(6), 850-64 (2005).

Korkut, Eyup
Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Septic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Krogmann, Uta
Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).

Kugrens, Paul
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Kunzru, Siddhartha
Manganese Amended Activated Alumina for Adsorption/Oxidation of Arsenic. — Siddhartha Kunzru and Malay Chaudhuri; 131(9), 1350-3 (T) (2005).

Kuo, Chao-Yin
Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (T) (2005).

Kuo, Jeff
Closure to "Standardized Collimated Beam Testing Protocol for Water/Wastewater Ultraviolet Disinfection" by Jeff Kuo, Ching-lin Chen, and Margaret Nellor. — Jeff Kuo, Ching-lin Chen, and Margaret Nellor; 131(5), 828-9 (2005).
—131(5), 829-30 (2005).

Lahav, Ori
Closure to "Modeling Hydrogen Sulfide Emission Rates in Gravity Collection Systems" by Ori Lahav, Yue Lu, Uri Shavit, and Richard E. Loewenthal. — Ori Lahav; 131(12), 1762-4 (2005).

Lai, Keith C. K.
Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-606 (2005).

Lam, Chester S. C.
Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-606 (2005).

Lambert, Douglas C.
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

Lane, J.
Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Laridi, Rachid
Removal of Refractory Organic Compounds in Liquid Swine Manure Obtained from a Biofiltration Process Using an Electrochemical Treatment. — Rachid Laridi, Patrick Drogui, Hamel Benmoussa, Jean-François Blais, and Jean Christian Auclair; 131(9), 1302-10 (2005).

Lau, Sim-Lin
Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Lay, Jiunn-Jyi
Factors Affecting Hydrogen Production from Food Wastes by ***Clostridium***-Rich Composts. — Jiunn-Jyi Lay, Kuo-Shuh Fan, Jieng-I Hwang, James-I Chang, and Ping-Chi Hsu; 131(4), 595-602 (2005).

Lee, Chin-I
Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Lee, Chung-Kung
Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Lee, D. J.
Dual Conditioning of Sludge Utilizing Polyampholyte. — J. S. Wang, J. C. Liu, and D. J. Lee; 131(12), 1659-66 (2005).

Lee, Duu-Jong
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).

Lee, Jeong-Yub
Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).

Lee, Jiunn-Fwu
Volatilization Characteristics of Organic Compounds in the Coagulation Process. — Huan-Ping Chao, Jiunn-Fwu Lee, Chung-Kung Lee, and Hui-Chen Huang; 131(9), 1253-9 (2005).

Lee, Joseph H. W.
Diffusional Mass Transfer at Sediment–Water Interface of Cylindrical Sediment Oxygen Demand Chamber. — Feleke Arega and Joseph H. W. Lee; 131(5), 755-66 (2005).

Lee, Kenneth Y.
Photochemical Destruction of Tetrachloroethylene and Trichloroethylene from the Exhaust of an Air Stripper. — Kenneth Y. Lee and Jeong-Yub Lee; 131(10), 1441-6 (2005).

Lee, Young-Hak
Application of Multivariate Statistical Models to Prediction of NO_x Emissions from Complex Industrial Heater Systems. — Young-Hak Lee, Minjin Kim, and Chonghun Han; 131(6), 961-70 (2005).

Lei, Li
Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Leung, Dennis Y. C.
Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).

Levotch, S.
Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Li, An
Combined Effects of Aging and Cosolvents on Sequestration of Phenanthrene in Soils. — An Li and Xiaoyu Liu; 131(7), 1068-72 (2005).

Li, Yi
Cometabolic Transformation of High Concentrations of 4-Chlorophenol in an Immobilized Cell Hollow Fiber Membrane Bioreactor. — Yi Li and Kai-Chee Loh; 131(9), 1285-92 (2005).

Li, Yingxia
Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Li, Yuncang
Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).

Li, Zhaohui
Evaluation of Granular Surfactant-Modified/Zeolite Zero Valent Iron Pellets As a Reactive Material for Perchloroethylene Reduction. — Todd A. Burt, Zhaohui Li, and Robert S. Bowman; 131(6), 934-42 (2005).

Lien, Hsing-Lung
Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).

Limvoranusorn, Piyavadee
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Lin, Che-Jen
Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).

Lin, Chin-Jung
Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (T) (2005).

Lin, Hui
Mineralization and Biodegradability Enhancement of Low Level *p*-Nitrophenol in Water Using Fenton's Reagent. — Eakalak Khan, Roger W. Babcock, Jr., Tsung-Ming Hsu, and Hui Lin; 131(2), 327-31 (T) (2005).

Linden, Karl
Alternative Approaches to Modeling Fluence Distribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).

Linden, Karl G.
Discussion of "Standardized Collimated Beam Testing Protocol for Water/Wastewater Ultraviolet Disinfection" by Jeff Kuo, Ching-lin Chen, and Margaret Nellor. — James R. Bolton and Karl G. Linden; 131(5), 827 (2005).

Liu, Dingfang
Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).
Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Liu, Dong
Alternative Approaches to Modeling Fluence Distribution and Microbial Inactivation in Ultraviolet Reactors: Lagrangian versus Eulerian. — Joel J. Ducoste, Dong Liu, and Karl Linden; 131(10), 1393-403 (2005).

Liu, J. C.
Dual Conditioning of Sludge Utilizing Polyampholyte. — J. S. Wang, J. C. Liu, and D. J. Lee; 131(12), 1659-66 (2005).

Liu, W.
Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).

Liu, Xiaoyu
Combined Effects of Aging and Cosolvents on Sequestration of Phenanthrene in Soils. — An Li and Xiaoyu Liu; 131(7), 1068-72 (2005).

Liu, Yaorey
Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).

Liu, Yu
Effect of Substrate Nitrogen/Chemical Oxygen Demand Ratio on the Formation of Aerobic Granules. — Shu-Fang Yang, Joo-Hwa Tay, and Yu Liu; 131(1), 86-92 (2005).
Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (T) (2005).

Lo, Irene M. C.
Factors Affecting Inactivation Behavior in the Monochloramination Range. — Chii Shang, Yinan Qi, and Irene M. C. Lo; 131(1), 119-29 (2005).
Study on Optimal Conditions for Recovery of EDTA from Soil Washing Effluents. — Irene M. C. Lo and Weihua Zhang; 131(11), 1507-13 (2005).
Competitive Effects of Trichloroethylene on Cr(VI) Removal by Zero-Valent Iron. — Irene M. C. Lo, Chester S. C. Lam, and Keith C. K. Lai; 131(11), 1598-606 (2005).

Lo, Shang-Lien
Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (T) (2005).

Lockington, David
Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Loehr, Raymond C.
Application of an Intraparticle Diffusion Model to Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).

Loge, Frank J.
Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).

Loh, Kai-Chee
Cometabolic Transformation of High Concentrations of 4-Chlorophenol in an Immobilized Cell Hollow Fiber Membrane Bioreactor. — Yi Li and Kai-Chee Loh; 131(9), 1285-92 (2005).

Losh, Derek E.
Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Lowe, Scott A.
Discussion of "Oxygen Sag Models for Multiorder Biochemical Oxygen Demand Reactions" by Donald Dean Adrian, Emerald M. Roider, and Thomas G. Sanders. — Scott A. Lowe; 131(12), 1760 (2005).

Lu, Fang
Simplified Model for the Class-I Settling Tanks Design. — Yee-Chung Jin, Fang Lu, and Md. Badruzzaman; 131(12), 1755-9 (T) (2005).

Lu, Guoping
Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Ludlow, D.
Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (T) (2005).

Luketina, David
Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).

Lundh, Måns
Residence Time Distribution Characterization of the Flow Structure in Dissolved Air Flotation. — Måns Lundh and Lennart Jönsson; 131(1), 93-101 (2005).

Luthy, Richard G.
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

Lyn, D. A.
Numerical Computational Fluid Dynamics-Based Models of Ultraviolet Disinfection Channels. — D. A. Lyn and E. R. Blatchley, III; 131(6), 838-49 (2005).

MacKay, Allison A.
Estimating the Removal of Anthropogenic Organic Chemicals from Raw Drinking Water by Coagulation Flocculation. — Bill D. Ballard and Allison A. MacKay; 131(1), 108-18 (2005).

Macomber, Jeff
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Mahendraker, Venkatram
Comparison of Oxygen Transfer Parameters Determined from the Steady State Oxygen Uptake Rate and the Non-Steady-State Changing Power Level Methods. — Venkatram Mahendraker, Donald S. Mavinic, and Kenneth J. Hall; 131(5), 692-701 (2005).
Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Majone, M.
Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Mal, B. C.
Design Characteristics of Single Hub Paddle Wheel Aerator. — Sanjib Moulick, S. Bandyopadhyay, and B. C. Mal; 131(8), 1147-54 (2005).

Margaritis, Argyrios
Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).

Mariño, Miguel A.
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Marion, Andrea
Diffusive Behavior of Bedform-Induced Hyporheic Exchange in Rivers. — Andrea Marion and Mattia Zaramella; 131(9), 1260-6 (2005).

Martin, Joseph P.
Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Septic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Massoudieh, Arash
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Mathews, Alexander P.
Effect of Adsorbent Particle Layering on Performance of Conventional and Tapered Fixed-Bed Adsorbers. — Alexander P. Mathews; 131(11), 1488-94 (2005).

Mavinic, Donald S.
Comparison of Oxygen Transfer Parameters Determined from the Steady State Oxygen Uptake Rate and the Non-Steady-State Changing Power Level Methods. — Venkatram Mahendraker, Donald S. Mavinic, and Kenneth J. Hall; 131(5), 692-701 (2005).
Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Mayo, Paul R.
Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

McBride, Graham B.
Rapid Calculation of Oxygen in Streams: Approximate Delta Method. — Graham B. McBride and Steven C. Chapra; 131(3), 336-42 (2005).

McCourt, Bill
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

McDonough, Kathleen M.
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

McNamara, Sean W.
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. I: Design and Hydraulic Characteristics. — Sean W. McNamara and Richard G. Luthy; 131(1), 11-20 (2005).
Sorbent Wicking Device for Sampling Hydrophobic Organic Compounds in Unsaturated Soil Pore Water. II: Chemical Capture, Recovery, and Analysis. — Sean W. McNamara and Richard G. Luthy; 131(1), 21-8 (2005).
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

McPherson, Timothy N.
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Meeusen, Anne
Inactivation of *Bacillus* Spores by Ultraviolet or Gamma Radiation. — Ernest R. Blatchley, III, Anne Meeusen, Arthur I. Aronson, and Lindsay Brewster; 131(9), 1245-52 (2005).

Meier, W. K.
Mountain Streams—Modeling Hydraulics and Substance Transport. — W. K. Meier and P. Reichert; 131(2), 252-61 (2005).

Melidis, P.
Biosensor for Toxic Detection and Process Control in Nitrification Plants. — P. Melidis and A. Aivasidis; 131(4), 658-63 (T) (2005).

Mercier, Guy
Laboratory Study of Successive Soil Saline Leaching and Electrochemical Lead Recovery. — Zied Djedidi, Patrick Drogui, Ridha Ben Cheikh, Guy Mercier, and Jean-François Blais; 131(2), 305-14 (2005).

Miller, Charles J.
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Moe, William M.
Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).

Moir, Jim
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Moore, Angela M.
Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).

Moreno, Natàlia
Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).

Morgenroth, Eberhard
Modeling Steady-State Biofilms with Dual-Substrate Limitations. — Shaoying Qi and Eberhard Morgenroth; 131(2), 320-6 (T) (2005).

Morley, Matthew C.
Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).

Morrill, Jean C.
Estimating Stream Temperature from Air Temperature: Implications for Future Water Quality. — Jean C. Morrill, Roger C. Bales, and Martha H. Conklin; 131(1), 139-46 (2005).

Morvan, Hervé P.
Discussion of "On Models, Modeling, and Modelers in the Environmental Arena" by Dr. Hilary I. Inyang. — Hervé P. Morvan; 131(3), 496-7 (2005).

Moulick, Sanjib
Design Characteristics of Single Hub Paddle Wheel Aerator. — Sanjib Moulick, S. Bandyopadhyay, and B. C. Mal; 131(8), 1147-54 (2005).

Mugunthan, Pradeep
Hydrologic and Geochemical Factors Governing Chemical Evolution of Discharges from an Abandoned, Flooded, Underground Coal Mine Network. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(4), 643-50 (2005).
Processes Governing Flow and Chemical Characteristics of Discharges from Free-Draining, Underground Coal Mines. — Kathleen M. McDonough, Douglas C. Lambert, Pradeep Mugunthan, and David A. Dzombak; 131(10), 1361-8 (2005).

Munter, Rein
Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Murdoch, Lawrence C.
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).

Mutoti, G.
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Nakhla, George
Utilization of an Activated Sludge for the Improvement of an Existing Thermophilic Wastewater Treatment System. — David Quesnel and George Nakhla; 131(4), 570-8 (2005).
Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).
Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (T) (2005).

Nam, Kyoungphile
Estimation of Mass Transport Parameters of Organic Compounds through High Density Polyethylene Geomembranes Using a Modifield Double-Compartment Apparatus. — Jin Chul Joo, Kyoungphile Nam, and Jae Young Kim; 131(5), 790-9 (2005).

Narbaitz, Roberto M.
Electrochemical Reactivation of Granular Activated Carbon: Effect of Electrolyte Mixing. — Ayoub Karimi-Jashni and Roberto M. Narbaitz; 131(3), 443-9 (2005).

Nartey, Archie
Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Naser, Gh.
Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Nayar, Rajeev
Effects of Weathering on Treatment of Lead Contaminated Soils. — Robert Stanforth, Chin-Foo Yap, and Rajeev Nayar; 131(1), 38-48 (2005).

Nellor, Margaret
Closure to "Standardized Collimated Beam Testing Protocol for Water/Wastewater Ultraviolet Disinfection" by Jeff Kuo, Ching-lin Chen, and Margaret Nellor. — Jeff Kuo, Ching-lin Chen, and Margaret Nellor; 131(5), 828-9 (2005).
—131(5), 829-30 (2005).

Neo, Sim Yee
Microbial Populations in Tropical Reservoirs Using Flow Cytometry. — Karina Yew-Hoong Gin and Sim Yee Neo; 131(8), 1187-93 (2005).

Neufeld, Ronald D.
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Ng, How Y.
Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).

Ng, W. J.
Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).
Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Ng, Wun J.
Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).

Nguyen, My-Linh
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Niedermeier, Craig A.
Application of an Intraparticle Diffusion Model to Describe the Release of Polyaromatic Hydrocarbons from Field Soils. — Craig A. Niedermeier and Raymond C. Loehr; 131(6), 943-51 (2005).

Nielsen, Asbjórn Haaning
Discussion of "Modeling Hydrogen Sulfide Emission Rates in Gravity Sewage Collection Systems" by Ori Lahav, Yue Lu, Uri Shavit, and Richard E. Loewenthal. — Asbjórn Haaning Nielsen, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1761-2 (2005).

Nkhalambayausi-Chirwa, Evans M.
Modeling Cr(VI) Reduction and Phenol Degradation in a Coculture Biofilm Reactor. — Evans M. Nkhalambayausi-Chirwa and Yi-Tin Wang; 131(11), 1495-506 (2005).

Noel, Mark R.
Incremental Improvements in Chesapeake Bay Environmental Model Package. — Carl F. Cerco and Mark R. Noel; 131(5), 745-54 (2005).

Nordby, George R.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Odom, K.
Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).

Oerther, Daniel B.
Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Ojaste, Heldi
Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Ojha, C. S. P.
Estimating Nutrient Outflow from Argicultural Watersheds to the River Kali in India. — Ramakar Jha, C. S. P. Ojha, and K. K. S. Bhatia; 131(12), 1706-15 (2005).

Oleszkiewicz, J. A.
Bioaugmentation with Nitrifying Bacteria Acclimated to Different Temperatures. — M. A. Head and J. A. Oleszkiewicz; 131(7), 1046-51 (2005).

Oleszkiewicz, Jan A.
Enteric Virus Indicators: Reovirus Versus Poliovirus. — Jamie Brewster, Jan A. Oleszkiewicz, Kevin M. Coombs, and Archie Nartey; 131(7), 1010-3 (2005).

Ong, S. L.
Use of a Sequencing Batch Reactor for Nitrogen and Phosphorus Removal from Municipal Wastewater. — J. Y. Hu, S. L. Ong, W. J. Ng, and W. Liu; 131(5), 734-44 (2005).
Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Ong, Say L.
Effects of Sodium Chloride on the Performance of a Sequencing Batch Reactor. — How Y. Ng, Say L. Ong, and Wun J. Ng; 131(11), 1557-64 (2005).

Örmeci, Banu
Protocol to Measure Network Strength of Sludges and Its Implications for Dewatering. — Banu Örmeci and Mohammad M. Abu-Orf; 131(1), 80-5 (2005).
Measuring Sludge Network Strength Using Rheology and Relation to Dewaterability, Filtration, and Thickening—Laboratory and Full-Scale Experiments. — Mohammad M. Abu-Orf and Banu Örmeci; 131(8), 1139-46 (2005).

Orr, David W.
Pollution Buildup on Road Surfaces. — Ana Deletic and David W. Orr; 131(1), 49-59 (2005).

O'Sullivan, Cathryn
Sources of Hydrogen Sulfide in Groundwater on Reclaimed Land. — Cathryn O'Sullivan, William Clarke, and David Lockington; 131(3), 471-7 (2005).

Ouyang, C. F.
Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Paez-Rubio, Tania
Estimating Solar and Nonsolar Inactivation Rates of Airborne Bacteria. — Tania Paez-Rubio and Jordan Peccia; 131(4), 512-7 (2005).

Pan, Jill Ruhsing
Mixing Water Treatment Residual with Excavation Waste Soil in Brick and Artificial Aggregate Making. — Chihpin Huang, Jill Ruhsing Pan, and Yaorey Liu; 131(2), 272-7 (2005).

Pardue, John H.
Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).

Park, Heekyung
Effective Diameter for Shear-Induced Diffusion for Characterizing Cake Formation in Crossflow Microfiltration at Polydisperse Conditions. — Suhan Kim and Heekyung Park; 131(6), 865-73 (2005).

Park, Jin-won
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Park, Kwinam
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Park, Seok S.
In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (T) (2005).

Parkin, Gary
Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Patel, Jignesh
Optimization of Biological Nutrient Removal in a Membrane Bioreactor System. — Jignesh Patel, George Nakhla, and Argyrios Margaritis; 131(7), 1021-9 (2005).

Patidar, S. K.
Anaerobic Degradation of Sulfate Laden Organics Employing Different Reactor System Configurations. — S. K. Patidar and Vinod Tare; 131(2), 216-24 (2005).

Peccia, Jordan
Estimating Solar and Nonsolar Inactivation Rates of Airborne Bacteria. — Tania Paez-Rubio and Jordan Peccia; 131(4), 512-7 (2005).

Pedocchi, Francisco
Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Pennell, S.
Closure to "A Model of Coupled Heat and Moisture Transport in an Annular Clay Barrier" by L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell. — L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell; 131(11), 1615-6 (2005).

Petersen, Tina M.
Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Pettey, Lucas
Kinetic Modeling of the Gas-Phase Oxidation of Nitric Oxide Using Hydrogen Peroxide. — Piyavadee Limvoranusorn, C. David Cooper, John D. Dietz, Christian A. Clausen, Lucas Pettey, and Michelle M. Collins; 131(4), 518-25 (2005).

Pfeiffer, Patricia R.
Physical Properties of Vegetable Oil and Chlorinated Ethene Mixtures. — Patricia R. Pfeiffer, Angela R. Bielefeldt, Tissa Illangasekare, and Bruce Henry; 131(10), 1447-52 (2005).

Piedra-Cueva, Ismael
Camp and Stein's Velocity Gradient Formalization. — Francisco Pedocchi and Ismael Piedra-Cueva; 131(10), 1369-76 (2005).

Pope, Gary A.
Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (T) (2005).

Powell, Jon
Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).

Prairie, James R.
Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).

Prunty, Lyle
Discussion of "A Model of Coupled Heat and Moisture Transport in an Annular Clay Barrier" by L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell. — Lyle Prunty; 131(11), 1614-5 (2005).

Pullammanappallil, Pratap C.
Full-Scale Application of a Dynamic Model for High-Rate Anaerobic Wastewater Treatment Systems. — Ian R. Ramsay and Pratap C. Pullammanappallil; 131(7), 1030-6 (2005).

Putz, Andrea R. H.
Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Qi, Bing
Treatment of Paint Spray Booth Off-Gases in a Fungal Biofilter. — Bing Qi, William M. Moe, and Kerry A. Kinney; 131(2), 180-9 (2005).

Qi, Shaoying
Modeling Steady-State Biofilms with Dual-Substrate Limitations. — Shaoying Qi and Eberhard Morgenroth; 131(2), 320-6 (T) (2005).

Qi, Yinan
Factors Affecting Inactivation Behavior in the Monochloramination Range. — Chii Shang, Yinan Qi, and Irene M. C. Lo; 131(1), 119-29 (2005).

Qian, Yi
Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Querol, Xavier
Metal Adsorption on Clays from Pyrite Contaminated Soil. — Jordi Cama, Carles Ayora, Xavier Querol, and Natàlia Moreno; 131(7), 1052-6 (2005).

Quesnel, David
Utilization of an Activated Sludge for the Improvement of an Existing Thermophilic Wastewater Treatment System. — David Quesnel and George Nakhla; 131(4), 570-8 (2005).

Quiñones-Bolaños, Edgar
Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Rabideau, Alan J.
Analytical Models for the Design of Iron-Based Permeable Reactive Barriers. — Alan J. Rabideau, Raghavendra Suribhatla, and James R. Craig; 131(11), 1589-97 (2005).

Rabinowitz, Barry
Effect of Nonsteady state H_2O_2 Tests on Oxygen Transfer Rate in Enhanced Biological Phosphorus Removal Process. — Venkatram Mahendraker, Donald S. Mavinic, and Barry Rabinowitz; 131(12), 1684-97 (2005).

Rajagopalan, Balaji
Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).

Ramsay, Ian R.
Full-Scale Application of a Dynamic Model for High-Rate Anaerobic Wastewater Treatment Systems. — Ian R. Ramsay and Pratap C. Pullammanappallil; 131(7), 1030-6 (2005).

Ranck, J. Michael
BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Randall, A. A.
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Randall, Clifford W.
Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).
Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Rao, Pritesh
Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).

Rauch, Tanja
Quantifying Biological Organic Carbon Removal in Groundwater Recharge Systems. — Tanja Rauch and Jörg E. Drewes; 131(6), 909-23 (2005).

Reichert, P.
Mountain Streams—Modeling Hydraulics and Substance Transport. — W. K. Meier and P. Reichert; 131(2), 252-61 (2005).

Reinhart, Debra R.
Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).

Revah, Sergio
Fungal Biofiltration of Toluene on Ceramic Rings. — Aitor Aizpuru, Bertrand Dunat, Pierre Christen, Richard Auria, Inés García-Peña, and Sergio Revah; 131(3), 396-402 (2005).

Richardson, Clinton P.
2,4,6-Trinitrotoluene Transformation Using Spinacia Oleracea: Saturation Kinetics of the Nitrate Reductase Enzyme. — Clinton P. Richardson and Enric Bonmati; 131(5), 800-9 (2005).

Richardson, Stephen D.
Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Rifai, Hanadi S.
Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Robinson, R. B.
Identifying Outliers in Correlated Water Quality Data. — R. B. Robinson, Chris D. Cox, and K. Odom; 131(4), 651-7 (2005).

Rodriguez-Fuentes, Rafael
Disinfection By-Product Precursor Adsorption as Function of GAC Properties: Case Study. — Rafael Rodriguez-Fuentes, Brian A. Hilts, and Bruce I. Dvorak; 131(10), 1462-5 (T) (2005).

Roider, Emerald M.
Closure to "Oxygen Sag Models for Multiorder Biochemical Oxygen Demand Reactions" by Donald Dean Adrian, Emerald M. Roider, and Thomas G. Sanders. — Donald Dean Adrian, Emerald M. Roider, and Thomas G. Sanders; 131(12), 1760-1 (2005).

Ross, Chapman
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).

Rossi, L.
Closure to "A Model of Coupled Heat and Moisture Transport in an Annular Clay Barrier" by L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell. — L. Rossi, H. I. Inyang, J. Graham-Eagle, and S. Pennell; 131(11), 1615-6 (2005).

Rudolph, Beth E.
Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Rusch, Kelly A.
Fecal Coliform Removal within a Marshland Upwelling System Consisting of Scatlake Soils. — Stephen D. Richardson and Kelly A. Rusch; 131(1), 60-70 (2005).

Ruud, Nels C.
Goodness-of-Fit Test for Modeling Tracer Breakthrough Curves in Wetlands. — David M. Crohn, Nels C. Ruud, Joseph G. Decruyenaere, and David B. Carlon; 131(2), 242-51 (2005).

Sahoo, Goloka Behari
Gas Transfer During Bubbler Destratification of Reservoirs. — Goloka Behari Sahoo and David Luketina; 131(5), 702-15 (2005).

Saikaly, Pascal E.
Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Salehi, A. A.
Two-Dimensional Simulation Model of Sediment Removal and Flow in Rectangular Sedimentation Basin. — Gh. Naser, B. W. Karney, and A. A. Salehi; 131(12), 1740-9 (2005).

Salmon, Lynn G.
Airborne Particles in New Museum Facilities. — Lynn G. Salmon, Paul R. Mayo, Glen R. Cass, and Christos S. Christoforou; 131(10), 1453-61 (2005).

Sanders, Thomas G.
Closure to "Oxygen Sag Models for Multiorder Biochemical Oxygen Demand Reactions" by Donald Dean Adrian, Emerald M. Roider, and Thomas G. Sanders. — Donald Dean Adrian, Emerald M. Roider, and Thomas G. Sanders; 131(12), 1760-1 (2005).

Sansalone, John J.
Closure to "Kinematic Wave Model of Urban Pavement Runoff Subject to Traffic Loadings" by Chad M. Cristina and John J. Sansalone. — Chad M. Cristina and John J. Sansalone; 131(1), 170 (2005).
Influence of Hydrology on Rainfall-Runoff Metal Element Speciation. — Christopher M. Dean, John J. Sansalone, Frank K. Cartledge, and John H. Pardue; 131(4), 632-42 (2005).
Perspective on the Synthesis of Unit Operations and Process (UOP) Concepts with Hydrologic Controls for Rainfall-Runoff. — John J. Sansalone; 131(7), 995-7 (2005).
Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).
Adsorption Kinetics for Urban Rainfall-Runoff Metals by Composite Oxide-Coated Polymeric Media. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1168-77 (2005).
Comparison of Sorptive Filter Media for Treatment of Metals in Runoff. — Dingfang Liu, John J. Sansalone, and Frank K. Cartledge; 131(8), 1178-86 (2005).

Sarasa, Judith
Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).

Saul, A. J.
Modeling Discoloration in Potable Water Distribution Systems. — J. B. Boxall and A. J. Saul; 131(5), 716-25 (2005).

Schroeder, Edward D.
Transient Response of Flow-Direction-Switching Vapor-Phase Biofilters. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(7), 999-1009 (2005).
Regular Transient Loading Response in a Vapor-Phase Flow-Direction-Switching Biofilter. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(12), 1649-58 (2005).

Seagren, Eric A.
Comparison of Bioenhancement of Nonaqueous Phase Liquid Pool Dissolution with First- and Zero-Order Biokinetics. — Sarika Gupta and Eric A. Seagren; 131(1), 165-9 (T) (2005).
DDT, Human Health, and the Environment. — Eric A. Seagren; 131(12), 1617-9 (2005).

Seitz, T.
Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Sen, Dipankar
Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).

Serrato, Michael
Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Shan, Huifeng
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Shang, Chii
Factors Affecting Inactivation Behavior in the Monochloramination Range. — Chii Shang, Yinan Qi, and Irene M. C. Lo; 131(1), 119-29 (2005).

Sharma, Keshab Raj
Process Optimization of an Aerobic Upflow Sludge Blanket Reactor System. — Keshab Raj Sharma and Ju-Chang Huang; 131(6), 901-8 (2005).

Sheng, Y. Peter
Three-Dimensional Modeling of Sediment and Phosphorus Dynamics in Lake Okeechobee, Florida: Spring 1989 Simulation. — XinJian Chen and Y. Peter Sheng; 131(3), 359-74 (2005).

Shifrin, Neil S.
Pollution Management in the Twentieth Century. — Neil S. Shifrin; 131(5), 676-91 (2005).

Shih, Tom
Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Shin, Ho-chul
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Ho-cheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Shirazi, Saqib
Mechanistic Model for $CaSO_4$ Fouling on Nanofiltration Membrane. — Che-Jen Lin, Saqib Shirazi, and Pritesh Rao; 131(10), 1387-92 (2005).

Show, Kuan-Yeow
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).

Siegrist, Robert L.
Characteristics of Potassium Permanganate Encapsulated in Polymer. — Chapman Ross, Lawrence C. Murdoch, David L. Freedman, and Robert L. Siegrist; 131(8), 1203-11 (2005).
Factors Affecting Effectiveness and Efficiency of DNAPL Destruction Using Potassium Permanganate and Catalyzed Hydrogen Peroxide. — Michelle L. Crimi and Robert L. Siegrist; 131(12), 1724-32 (2005).

Singh, Sushil K.
Master Diagnostic Curve for Dispersion Coefficient of Soils. — Sushil K. Singh; 131(6), 988-93 (T) (2005).

Singh, Vijay P.
Fractional Kinetic Model for First Flush of Stormwater Pollutants. — Zhi-Qiang Deng, João L. M. P. de Lima, and Vijay P. Singh; 131(2), 232-41 (2005).

Smith, James E., Jr.
Challenges in Sludge Stabilization: Regulatory Compliance in the Design and Operation of Facilities. — K. Richard Tsang and James E. Smith, Jr.; 131(6), 834-7 (2005).

Smith, John R.
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

Sobsey, Mark D.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Sommerfeld, Milton
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Song, Hocheol
Emission Control of NO and SO_2 for the High-Temperature and Low O_2 Concentration Combustion of Coke by Urea and NH_4HCO_3. — Hocheol Song, Seokheung Chang, Kwinam Park, Ho-chul Shin, Jin-won Park, Eung-soo Choi, and Wan-wook Huh; 131(2), 190-5 (2005).

Song, Lianfa
Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Sorial, George A.
Removal of Methyl Isobutyl Ketone From Contaminated Air by Trickle-Bed Air Biofilter. — Zhangli Cai, Daekeun Kim, and George A. Sorial; 131(9), 1322-9 (2005).

Souter, Nicki
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Speitel, Gerald E., Jr.
Adsorption of RDX and HMX in Rapid Small-Scale Column Tests: Implications for Full-Scale Adsorbers. — Matthew C. Morley, Jennifer L. Henke, and Gerald E. Speitel, Jr.; 131(1), 29-37 (2005).
Removal of Nonbiodegradable Chemicals from Mixtures during Granular Activated Carbon Bioregeneration. — Andrea R. H. Putz, Derek E. Losh, and Gerald E. Speitel, Jr.; 131(2), 196-205 (2005).

Sponza, Delia Teresa
Biotransformation of Carbon Tetrachloride and Anaerobic Granulation in a Upflow Anaerobic Sludge Blanket Reactor. — Delia Teresa Sponza; 131(3), 425-33 (2005).

Squibbs, Martin
Sustainable Disposal of Domestic Sanitary Waste. — Richard Ashley, David Blackwood, Nicki Souter, Sarah Hendry, Jim Moir, Judith Dunkerley, John Davies, David Butler, Andrew Cook, Jim Conlin, Martin Squibbs, Andrew Britton, and Peter Goldie; 131(2), 206-15 (2005).

Sriwiriyarat, Tongchai
Computer Program Development for the Design of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes. — Tongchai Sriwiriyarat, Clifford W. Randall, and Dipankar Sen; 131(11), 1540-9 (2005).
Evaluation of Integrated Fixed Film Activated Sludge Wastewater Treatment Processes at High Mean Cells Residence Time and Low Temperatures. — Tongchai Sriwiriyarat and Clifford W. Randall; 131(11), 1550-6 (2005).

Stanforth, Robert
Effects of Weathering on Treatment of Lead Contaminated Soils. — Robert Stanforth, Chin-Foo Yap, and Rajeev Nayar; 131(1), 38-48 (2005).

Stefan, Heinz G.
Closure to "Periodic Diffusional Mass Transfer Near Sediment/Water Interface: Theory" by Makoto Higashino, Heinz G. Stefan, and Charles J. Gantzer. — Makoto Higashino, Heinz G. Stefan, and Charles J. Gantzer; 131(1), 173 (2005).
Oxygen Demand by a Sediment Bed of Finite Length. — Makoto Higashino and Heinz G. Stefan; 131(3), 350-8 (2005).

Stein, A. Ron
Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Stenstrom, Michael K.
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).
Particle Size Distribution in Highway Runoff. — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 131(9), 1267-76 (2005).

Strom, Peter F.
Composition and Characteristics of Excavated Materials from a New Jersey Landfill. — Ross M. Hull, Uta Krogmann, and Peter F. Strom; 131(3), 478-90 (2005).

Stroot, Peter G.
Dynamic Growth Rates of Microbial Populations in Activated Sludge Systems. — Peter G. Stroot, Pascal E. Saikaly, and Daniel B. Oerther; 131(12), 1698-705 (2005).

Sturbaum, Gregory D.
Filtration Removals of Microorganisms and Particles. — David W. Hendricks, William F. Clunie, Gregory D. Sturbaum, Donald A. Klein, Tory L. Champlin, Paul Kugrens, Julie Hirsch, Bill McCourt, George R. Nordby, Mark D. Sobsey, D. John Hunt, and Martin J. Allen; 131(12), 1621-32 (2005).

Suarez, Monica P.
Bacteria Loads from Point and Nonpoint Sources in an Urban Watershed. — Tina M. Petersen, Hanadi S. Rifai, Monica P. Suarez, and A. Ron Stein; 131(10), 1414-25 (2005).

Suffet, I. H.
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Suffet, Mel
Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Suidan, Makram T.
Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).
Biological Kinetic Data Evaluation of an Activated Sludge System Coupled with an Ultrafiltration Membrane. — Jeff Macomber, Nazim Cicek, Makram T. Suidan, Jan Davel, Philippe Ginestet, and Jean M. Audic; 131(4), 579-86 (2005).

Sullivan, Enid J.
BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Sullivan, Terrence
Long-Term Verification of Cover Systems Using Perfluorocarbon Tracers. — John Heiser, Terrence Sullivan, and Michael Serrato; 131(6), 952-60 (2005).

Surampalli, Rao
Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Suribhatla, Raghavendra
Analytical Models for the Design of Iron-Based Permeable Reactive Barriers. — Alan J. Rabideau, Raghavendra Suribhatla, and James R. Craig; 131(11), 1589-97 (2005).

Sutherland, Justin
Treatability of Alternative Fuel Oxygenates Using Advanced Oxidation, Air Stripping, and Carbon Adsorption. — Justin Sutherland, Craig Adams, and Jamshid Kekobad; 131(4), 623-31 (2005).

Sutt, Johannes
Complexed Iron Removal from Groundwater. — Rein Munter, Heldi Ojaste, and Johannes Sutt; 131(7), 1014-20 (2005).

Suttigarn, Arthon
Arsenite Oxidation by *Alcaligenes faecalis* Strain O1201. — Arthon Suttigarn and Yi-Tin Wang; 131(9), 1293-301 (2005).

Szabo, Jeffrey G.
Performance of Wet Weather Treatment Facility for Control of Combined Sewer Overflows: Case Study in Cincinnati, Ohio. — Jeffrey G. Szabo, Steven G. Buchberger, and Paul L. Bishop; 131(3), 375-86 (2005).

Tabak, Henry H.
Adsorption of Polycyclic Aromatic Hydrocarbons in Aged Harbor Sediments. — Amid P. Khodadoust, Li Lei, Jimmy E. Antia, Rajesh Bagchi, Makram T. Suidan, and Henry H. Tabak; 131(3), 403-9 (2005).

Tare, Vinod
Anaerobic Degradation of Sulfate Laden Organics Employing Different Reactor System Configurations. — S. K. Patidar and Vinod Tare; 131(2), 216-24 (2005).

Tay, Joo-Hwa
Effect of Substrate Nitrogen/Chemical Oxygen Demand Ratio on the Formation of Aerobic Granules. — Shu-Fang Yang, Joo-Hwa Tay, and Yu Liu; 131(1), 86-92 (2005).
Lightweight Aggregates from Industrial Sludge–Marine Clay Mixes. — Kuan-Yeow Show, Duu-Jong Lee, Joo-Hwa Tay, Sze-Yunn Hong, and Chao-Yu Chien; 131(7), 1106-13 (2005).
Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (T) (2005).

Tay, Kwee Guan
Nonlinear Behavior of Permeate Flux in Full-Scale Reverse Osmosis Processes. — Kwee Guan Tay, Lianfa Song, S. L. Ong, and W. J. Ng; 131(11), 1481-7 (2005).

Taylor, J. S.
Modified Larsons Ratio Incorporating Temperature, Water Age, and Electroneutrality Effects on Red Water Release. — S. A. Imran, J. D. Dietz, G. Mutoti, J. S. Taylor, and A. A. Randall; 131(11), 1514-20 (2005).

Teel, Amy L.
Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).
Chemistry of Modified Fenton's Reagent (Catalyzed H_2O_2 Propagations–CHP) for In Situ Soil and Groundwater Remediation. — Richard J. Watts and Amy L. Teel; 131(4), 612-22 (2005).
Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (T) (2005).

Teng, Zheng
Transient Rainfall-Runoff Loadings to a Partial Exfiltration System: Implications for Urban Water Quantity and Quality. — John J. Sansalone and Zheng Teng; 131(8), 1155-67 (2005).

Tham, Pham thi
Fate of Tolyltriazoles and Nonylphenol Ethoxylates in Upflow Anaerobic Sludge Blanket Reactors. — Pham thi Tham and Kevin J. Kennedy; 131(6), 892-900 (2005).

Timmons, T.
Trihalomethane and Haloacetic Acid Disinfection By-Products in Full-Scale Drinking Water Systems. — C. Adams, T. Timmons, T. Seitz, J. Lane, and S. Levotch; 131(4), 526-34 (2005).

Toombes, L.
Air–Water Mass Transfer on a Stepped Waterway. — L. Toombes and H. Chanson; 131(10), 1377-86 (2005).

Townsend, Timothy G.
Air Permeability of Waste in a Municipal Solid Waste Landfill. — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 131(11), 1565-73 (2005).
One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Trifoni, K.
Anaerobic Digestion of Food Industry Wastes: Effect of Codigestion on Methane Yield. — G. Carucci, F. Carrasco, K. Trifoni, M. Majone, and M. Beccari; 131(7), 1037-45 (2005).

Trussell, R. Rhodes
Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Trussell, R. Shane
Process Limits of Municipal Wastewater Treatment with the Submerged Membrane Bioreactor. — R. Shane Trussell, Samer Adham, and R. Rhodes Trussell; 131(3), 410-6 (2005).

Tsai, Christina W.
Evaluation of Probabilistic Point Estimate Methods in Uncertainty Analysis for Environmental Engineering Applications. — Christina W. Tsai and Samuela Franceschini; 131(3), 387-95 (2005).

Tsai, Chuen-Jinn
Reduction of Particle Reentrainment Using Porous Fence in Front of Dust Samples. — Cheng-Hsiung Huang, Chin-I Lee, and Chuen-Jinn Tsai; 131(12), 1644-8 (2005).

Tsang, K. Richard
Challenges in Sludge Stabilization: Regulatory Compliance in the Design and Operation of Facilities. — K. Richard Tsang and James E. Smith, Jr.; 131(6), 834-7 (2005).

Tuncay, Kagan
Landfill Settlement with Decomposition and Gas Generation. — Ertan Durmusoglu, M. Yavuz Corapcioglu, and Kagan Tuncay; 131(9), 1311-21 (2005).

Turan, Mustafa
Treatment of Landfill Leachate by a Combined Anaerobic Fluidized Bed and Zeolite Column System. — Mustafa Turan, Hakki Gulsen, and Mehmet S. Çelik; 131(5), 815-9 (T) (2005).

Turin, H. J.
Trace Metal Pollutant Load in Urban Runoff from a Southern California Watershed. — Timothy N. McPherson, Steven J. Burian, Michael K. Stenstrom, H. J. Turin, Michael J. Brown, and I. H. Suffet; 131(7), 1073-80 (2005).

Uchrin, Christopher G.
In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (T) (2005).

Urbonas, Ben
Urban Storm-Water Regulations—Are Impervious Area Limits a Good Idea? — Jonathan E. Jones, T. Andrew Earles, Elizabeth A. Fassman, Edwin E. Herricks, Ben Urbonas, and Jane K. Clary; 131(2), 176-9 (2005).

Vadas, Timothy M.
In situ Measurement of Macrophyte Photosynthesis and Respiration in Shallow Lakes. — Christopher G. Uchrin, John G. Hunter, Seok S. Park, and Timothy M. Vadas; 131(2), 315-9 (T) (2005).

van der Steen, N. P.
Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Vidic, Radisav
Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).

Vidic, Radisav D.
Pilot Scale Demonstration of Cross-Flow Ceramic Membrane Microfiltration for Treatment of Combined and Sanitary Sewer Overflows. — John A. Bendick, Charles J. Miller, Betty Jo Kindle, Huifeng Shan, Radisav D. Vidic, and Ronald D. Neufeld; 131(11), 1532-9 (2005).

Vogel, Richard M.
Probabilistic Behavior of Water-Quality Loads. — Richard M. Vogel, Beth E. Rudolph, and Richard P. Hooper; 131(7), 1081-9 (2005).

Vollertsen, Jes
Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).
Discussion of "Modeling Hydrogen Sulfide Emission Rates in Gravity Sewage Collection Systems" by Ori Lahav, Yue Lu, Uri Shavit, and Richard E. Loewenthal. — Asbjørn Haaning Nielsen, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1761-2 (2005).

Wang, J. S.
Dual Conditioning of Sludge Utilizing Polyampholyte. — J. S. Wang, J. C. Liu, and D. J. Lee; 131(12), 1659-66 (2005).

Wang, Jun
Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Wang, Yi-Tin
Arsenite Oxidation by *Alcaligenes faecalis* Strain O1201. — Arthon Suttigarn and Yi-Tin Wang; 131(9), 1293-301 (2005).
Modeling Cr(VI) Reduction and Phenol Degradation in a Coculture Biofilm Reactor. — Evans M. Nkhalambayausi-Chirwa and Yi-Tin Wang; 131(11), 1495-506 (2005).

Wangpaichitr, Medhi
Performance and Cost Evaluations of Synthetic Resin Technology for the Removal of Methyl *Tert*-Butyl Ether from Drinking Water. — Tom Shih, Medhi Wangpaichitr, and Mel Suffet; 131(3), 450-60 (2005).

Watts, Richard J.
Oxidative and Reductive Pathways in Manganese-Catalyzed Fenton's Reactions. — Richard J. Watts, Judith Sarasa, Frank J. Loge, and Amy L. Teel; 131(1), 158-64 (2005).
Chemistry of Modified Fenton's Reagent (Catalyzed H_2O_2 Propagations–CHP) for In Situ Soil

and Groundwater Remediation. — Richard J. Watts and Amy L. Teel; 131(4), 612-22 (2005).
Destruction of a Carbon Tetrachloride Dense Nonaqueous Phase Liquid by Modified Fenton's Reagent. — Richard J. Watts, Jimmy Howsawkeng, and Amy L. Teel; 131(7), 1114-9 (T) (2005).

Weber, A. Scott
Effect of Oil on Polychlorinated Biphenyl Phase Partitioning during Land Biotreatment of Impacted Sediment. — Sean W. McNamara, Upal Ghosh, David A. Dzombak, A. Scott Weber, John R. Smith, and Richard G. Luthy; 131(2), 278-86 (2005).

Weeber, Jeffrey L.
BTEX Removal from Produced Water Using Surfactant-Modified Zeolite. — J. Michael Ranck, Robert S. Bowman, Jeffrey L. Weeber, Lynn E. Katz, and Enid J. Sullivan; 131(3), 434-42 (2005).

Westerhoff, Paul
Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).
Characteristics and Reactivity of Algae-Produced Dissolved Organic Carbon. — My-Linh Nguyen, Paul Westerhoff, Lawrence Baker, Qiang Hu, Mario Esparza-Soto, and Milton Sommerfeld; 131(11), 1574-82 (2005).

Whitehead, Paul G.
Parameter Sensitivity and Predictive Uncertainty in a New Water Quality Model, Q^2. — Brian A. Cox and Paul G. Whitehead; 131(1), 147-57 (2005).

Williams, Joseph E.
Investigating Role of Growing Adsorbent Bed in a Dead-End PAC/UF Process. — Joseph E. Williams, Ramesh Goel, Joseph R. V. Flora, and Radisav Vidic; 131(11), 1583-8 (2005).

Winchester, John W.
Can Hazardous Waste Sites be Breached as a Result of Future Climate Change? — Timothy M. Kelly and John W. Winchester; 131(5), 810-4 (T) (2005).

Wise, William R.
One-Dimensional Gas Flow Model for Horizontal Gas Collection Systems at Municipal Solid Waste Landfills. — Timothy G. Townsend, William R. Wise, and Pradeep Jain; 131(12), 1716-23 (2005).

Wolfsberg, Andrew
Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Wong, R. C. K.
Effects of Clay Content and Temperature on Crude Oil (Nonvolatile Components) Transport in Unsaturated Soils: Centrifuge Study. — R. C. K. Wong; 131(10), 1473-8 (T) (2005).

Wong, Tommy S. W.
Discussion of "Kinematic Wave Model of Urban Pavement Rainfall-Runoff Subject to Traffic Loadings" by Chad M. Cristina and John J. Sansalone. — Tommy S. W. Wong; 131(1), 170 (2005).

Wood, Don J.
Waterhammer Analysis—Essential and Easy (and Efficient). — Don J. Wood; 131(8), 1123-31 (2005).

Wright, William F.
Transient Response of Flow-Direction-Switching Vapor-Phase Biofilters. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(7), 999-1009 (2005).
Regular Transient Loading Response in a Vapor-Phase Flow-Direction-Switching Biofilter. — William F. Wright, Edward D. Schroeder, and Daniel P. Y. Chang; 131(12), 1649-58 (2005).

Wu, Chung-Hsin
Pilot-Scale Electrocoagulation with Bipolar Aluminum Electrodes for On-Site Domestic Greywater Reuse. — Chin-Jung Lin, Shang-Lien Lo, Chao-Yin Kuo, and Chung-Hsin Wu; 131(3), 491-5 (T) (2005).

Xia, Jiyang
Numerical Simulation of Street Canyon Flows with Simple Building Geometries. — Jiyang Xia, M. Y. Hussaini, and Dennis Y. C. Leung; 131(7), 1099-105 (2005).

Xu, Hui
Derivation of a General Adsorption Isotherm Model. — Yu Liu, Hui Xu, and Joo-Hwa Tay; 131(10), 1466-8 (T) (2005).

Yaman, Cevat
Use of Layered Geotextiles to Provide a Substrate for Biomass Development in Treatment of Septic Tank Effluent Prior to Ground Infiltration. — Cevat Yaman, Joseph P. Martin, and Eyup Korkut; 131(12), 1667-75 (2005).

Yanful, Ernest K.
Simultaneous Nitrogen and Phosphorus Removal in a Continuously Fed and Aerated Membrane Bioreactor. — Ladan Holakoo, George Nakhla, Ernest K. Yanful, and Amarjeet S. Bassi; 131(10), 1469-72 (T) (2005).

Yang, He
Potential Improvement in Biofilter Design through the Use of Heterogeneous Packing and a Conical Biofilter Geometry. — He Yang and D. Grant Allen; 131(4), 504-11 (2005).

Yang, Shu-Fang
Effect of Substrate Nitrogen/Chemical Oxygen Demand Ratio on the Formation of Aerobic Granules. — Shu-Fang Yang, Joo-Hwa Tay, and Yu Liu; 131(1), 86-92 (2005).

Yap, Chin-Foo
Effects of Weathering on Treatment of Lead Contaminated Soils. — Robert Stanforth, Chin-Foo Yap, and Rajeev Nayar; 131(1), 38-48 (2005).

Yeung, Albert T.
Electrokinetic Remediation of Cadmium-Contaminated Clay. — Albert T. Yeung and Cheng-non Hsu; 131(2), 298-304 (2005).

Yongsiri, Chaturong
Influence of Wastewater Constituents on Hydrogen Sulfide Emission in Sewer Networks. — Chaturong Yongsiri, Jes Vollertsen, and Thorkild Hvitved-Jacobsen; 131(12), 1676-83 (2005).

Yoon, Jaekyung
Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).

Yoon, Yeomin
Rapid Small-Scale Column Tests for Arsenate Removal in Iron Oxide Packed Bed Columns. — Paul Westerhoff, David Highfield, Mohammad Badruzzaman, and Yeomin Yoon; 131(2), 262-71 (2005).
Determination of Perchlorate Rejection and Associated Inorganic Fouling (Scaling) for Reverse Osmosis and Nanofiltration Membranes under Various Operating Conditions. — Jaekyung Yoon, Yeomin Yoon, Gary Amy, and Namguk Her; 131(5), 726-33 (2005).

You, S. J.
Simultaneous Wastewater Nutrient Removal by a Novel Hybrid Bioprocess. — S. J. You and C. F. Ouyang; 131(6), 883-91 (2005).

Young, Thomas M.
Chloride Interactions with Iron Surfaces: Implications for Perchlorate and Nitrate Remediation Using Permeable Reactive Barriers. — Angela M. Moore and Thomas M. Young; 131(6), 924-33 (2005).
Modeling Fate and Transport of Roadside-Applied Herbicides. — Arash Massoudieh, Xinjiang Huang, Thomas M. Young, and Miguel A. Mariño; 131(7), 1057-67 (2005).

Yu, L.
Adsorption Isotherms for Methyl *Tert*-Butyl Ether and Other Fuel Oxygenates on Two Bituminous-Coal Activated Carbons. — L. Yu, C. Adams, and D. Ludlow; 131(6), 983-7 (T) (2005).

Yu, Ruey-Fang
On-line Monitoring of Wastewater True Color Using Digital Image Analysis and Artificial Neural Network. — Ruey-Fang Yu, Wen-Po Cheng, and Mei-Ling Chu; 131(1), 71-9 (2005).

Zagona, Edith A.
Statistical Nonparametric Model for Natural Salt Estimation. — James R. Prairie, Balaji Rajagopalan, Terrance J. Fulp, and Edith A. Zagona; 131(1), 130-8 (2005).

Zaramella, Mattia
Diffusive Behavior of Bedform-Induced Hyporheic Exchange in Rivers. — Andrea Marion and Mattia Zaramella; 131(9), 1260-6 (2005).

Zhang, Tian C.
Effects of Selected Good's pH Buffers on Nitrate Reduction by Iron Powder. — Tian C. Zhang and Yong H. Huang; 131(3), 461-70 (2005).
Enhancement of Nitrate Reduction in Fe^0-Packed Columns by Selected Cations. — Yong H. Huang and Tian C. Zhang; 131(4), 603-11 (2005).
Modeling of Nitrate Adsorption and Reduction in Fe^0-Packed Columns through Impulse Loading Tests. — Yong H. Huang and Tian C. Zhang; 131(8), 1194-202 (2005).

Zhang, Wei-xian
Hydrodechlorination of Chlorinated Ethanes by Nanoscale Pd/Fe Bimetallic Particles. — Hsing-Lung Lien and Wei-xian Zhang; 131(1), 4-10 (2005).

Zhang, Weihua
Study on Optimal Conditions for Recovery of EDTA from Soil Washing Effluents. — Irene M. C. Lo and Weihua Zhang; 131(11), 1507-13 (2005).

Zhang, Xiaoqi (Jackie)
Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH. — Jun Wang, Joel G. Burken, Xiaoqi (Jackie) Zhang, and Rao Surampalli; 131(10), 1433-40 (2005).

Zhang, Z.
Flow Data, Inflow/Infiltration Ratio, and Autoregressive Error Models. — Z. Zhang; 131(3), 343-9 (2005).

Zheng, Chunmiao
Effect of Uncertain Hydraulic Conductivity on the Simulated Fate and Transport of BTEX Compounds at a Field Site. — Guoping Lu, Chunmiao Zheng, and Andrew Wolfsberg; 131(5), 767-76 (2005).

Zhong, Lirong
Impact of Salinity on the Air–Water Partition Coefficient of Gas Tracers. — Lirong Zhong, Gary A. Pope, John C. Evans, and Richard J. Cameron; 131(9), 1354-7 (T) (2005).

Zhou, Hongde
Membrane Pervaporation for Wastewater Reuse in Microirrigation. — Edgar Quiñones-Bolaños, Hongde Zhou, and Gary Parkin; 131(12), 1633-43 (2005).

Zhou, Ping
Influence of Hydrodynamics on the Performance of a Biofilm Airlift Suspension Reactor. — Ping Zhou, Jiahan He, and Yi Qian; 131(6), 874-82 (2005).

Zimmo, O. R.
Effect of Organic Surface Load on Process Performance of Pilot-Scale Algae and Duckweed-Based Waste Stabilization Ponds. — O. R. Zimmo, N. P. van der Steen, and H. J. Gijzen; 131(4), 587-94 (2005).

Ziskind, G.
Experimental Verification of Induced Ventilation. — U. Drori, V. Dubovsky, and G. Ziskind; 131(5), 820-6 (T) (2005).

Zitomer, Daniel H.
Whole-Cell Fatty Acid Composition of Total Coliforms to Predict Sources of Fecal Contamination. — Berat Z. Haznedaroğlu, Daniel H. Zitomer, George B. Hughes-Strange, and Metin Duran; 131(10), 1426-32 (2005).

Zou, Linda
Photocatalytic Decolorization of Lanasol Blue CE Dye Solution Using a Flat-Plate Reactor. — Linda Zou, Yuncang Li, and Eric Hu; 131(1), 102-7 (2005).
